

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF THE PRESIDENT.

To the People of St. Louis:

The thirty-seventh annual report of the Board of President and Directors of the St. Louis Public Schools for the year ending June 30, 1891, is herewith submitted, and will be found to contain full and complete information concerning the administration of the important trust committed to the care of your representatives, one-third of whom are elected by the people at large and two-thirds chosen by districts composed of two wards each.

During the past fiscal year, the Board, by creating the two new offices of Auditor and Assistant Superintendent of Construction and Repairs, has been enabled to carry into effect changes that were necessary to thoroughly systematize the financial and building departments.

Mr. C. L. Hammerstein, who was appointed Auditor, had proved himself well qualified for the position during a term of nearly fifteen consecutive years of efficient service as assistant to the Secretary; and Mr. John Kelly, on recommendation of the Building Committee, was given the position of Assistant Superintendent of Construction and Repairs.

The reports of the Secretary, Superintendent, Principal of the High and Normal School, and Librarian of the Public Library, which are here given, exhibit in detail the growth and development of our educational system and the cost of maintaining it.

From Table I. of the appendix, can be ascertained the cost of conducting each school for the fiscal year; and in

Table VI. appendix, the cost per pupil in each school for teachers' salaries and for incidental expenses is given.

The Superintendent furnishes in the body of his report interesting statistical tables relative to the ages and birth-places of children attending our schools and the occupations of their parents or guardians.

RECEIPTS AND EXPENDITURES.

The total receipts for the fiscal year ending June 30th, 1891,	
were	\$1,178,596 74
The cash on hand at the close of the last fiscal year was..	115,258 52
	<hr/>
	\$1,293,955 26
The total expenditures for the year (including transfers to	
the Building Fund of \$188,500.00 and a transfer to the	
New High School Fund of \$50,000.00) were.....	1,279,672 01
	<hr/>
Leaving a cash balance in the Treasury July 1, 1891, of.....	\$14,283 25
The total Building Fund receipts for the past fiscal year,	
were.....	
From Transfer from General Fund.....	188,500 00
From Sales of School property (payments on account)...	34,300 00
	<hr/>
	\$222,800 00
Cash in Treasury July 1, 1890.....	6,699 63
	<hr/>
Total.....	\$229,499 63

In order to use this fund to the best possible advantage in providing, as far as possible, the additional School accommodations required in various parts of the city, the Board, after carefully investigating the demands of each district decided to erect the following additions and new buildings:

Addition to Pope School,	6 rooms	\$21,800 00
“ “ Arlington School,	4 “	17,817 00
“ “ Elleardville School,	6 “	19,250 00
“ “ Spring Avenue School,	4 “	12,985 00
“ “ Hamilton School,	4 “	15,358 00
“ “ Rock Spring School,	2 “	5,182 00
“ “ Banneker School,	3 “	14,740 00
“ “ Simmons School,	2 “	5,184 00
“ “ Garfield School,	4 “	15,300 00
Blair Kindergarten (equivalent to),	2 “	6,860 00
Vashon School,	2 “	3,643 00
Aldridge “	2 “	7,315 00
<hr/>		
Total.....	41 rooms.....	\$145,434 00
Average Cost per Room.....		\$3,547 00

The additions to the Pope, Rock Spring and Simmons Schools were occupied before the close of the School year and the remaining buildings will be ready for occupancy when school opens in September.

The shifting of the center of School population in the Bates and Chouteau School districts led to the sale of those School buildings during the past year.

To make suitable provision for the pupils who formally attended the Bates School and to prevent the overcrowding of schools in adjacent districts, the Board purchased what is now known as the Shields School, located on Seventh street between Carr and Biddle streets, a large and well constructed building, which, by intelligent re-arrangement, will accommodate at least one thousand pupils. The price paid for the Shields School property was one thousand dollars less than the sum realized from the sale of the Bates School, viz.: \$49,000.

During the year just completed, the Board succeeded in maturing and perfecting the plan devised some years ago for utilizing the funds accumulating in the Permanent Fund, so that a steady revenue might be realized therefrom. With this end in view all of the non-revenue producing property belonging to the Permanent Fund was

disposed of and immediate steps were taken to have plans prepared for a new Board of Education building to be erected on the lot occupied by the Benton School, located at the Northwest corner of Ninth and Locust streets. The plan finally selected contemplates a seven story fire proof building to cost about \$350,000, the three upper stories of which will be used for the offices of the Board and the Public Library. The four lower stories and basement will be rented for business purposes.

The Board has been fortunate also in being able to consummate the long deferred design of erecting a new High School building of sufficient size to accommodate all pupils pursuing either the High or Normal School course. The present High School building can only accommodate the Third and Senior Year Classes, while the Second year class is provided with accommodations in the old Foster Academy building on Sixteenth and Pine streets, and the First or Junior Year occupies the third and fourth stories of the Polytechnic Building on Seventh and Chestnut streets. The old Eads School building on Fifteenth and Pine streets is occupied by the Normal School. It is plain to be seen that the present arrangement is an unfortunate one from an educational as well as from an economical stand-point. A more desirable location for the New High School could not have been procured; for within the next few years it will be accessible to all parts of the city.

The new building will be erected on the foundations already constructed on the Grand avenue site near Morgan street, and will cost about \$200,000.00.

COURSE OF STUDY FOR THE HIGH SCHOOL.

Heretofore, there has been two courses in the High School: the classical, designed to give a preparation for college, and the English, designed to give a more general

training, and especially a more thorough knowledge of English literature.

These courses required all pupils to study Latin during the first two years. For many years there has been a growing desire on the part of the patrons of the schools, for a wider range of studies from which to select, with the view of a more definite preparation in a chosen direction.

To meet this demand the High School course has been revised, and arranged with five courses, namely: the Classical, the Scientific, the English, the Normal, and the Business Course. These courses include much in common, but each introduces and emphasizes studies that adapt it for its special end.

It is believed that this new course, when fully introduced, will give general satisfaction to the patrons of the High School.

KINDERGARTENS.

During the year kindergartens were established in two schools not heretofore having kindergartens, namely, the Lowell and the Simmons, the latter being a school for colored children. Of the sixty-two District Schools for white children, forty have kindergartens, and twenty-four have none. This statement, however, does not show the relation that the kindergartens sustain to the District Schools; for, if simply the number of schools be taken into consideration, it may appear that nearly forty-hundredths of the patrons of the schools are deprived of the privilege of availing themselves of the advantages of kindergarten training for their children.

But, to obtain a correct notion of the relation that the kindergarten sustains to the schools, a comparison must be made of the total enrollment in the schools having kindergartens with those not having them.

The total enrollment in the forty schools for white

children to which kindergartens are attached is 44,374, while the total enrollment in the twenty-four white schools not having kindergartens is only 9,426. Thus it appears that only 17 1-2 per cent. of the total enrollment is in schools not having kindergartens.

Most of these schools are small and are located in suburban or sparsely settled districts.

Of the eleven District Schools for colored children, five have kindergartens. Others will probably be established as soon as qualified persons can be found to take charge of them.

SUPERVISION.

The importance of thorough supervision of the work in the schools has long been recognized. In this particular the St. Louis School Board has not in any department exceeded the bounds established in other cities. In fact, in several departments of the work no special supervision has been established as in other large cities.

At the beginning of this school year the number of Assistant Superintendents was increased by one, thus making three instead of two, as heretofore. The duty of these assistants is to have general supervision over all of the work in the schools of their respective district. In addition to this there is one supervisor of drawing, one of kindergartens and four supervisors of music.

The number of schools made it impossible for two supervisors of music to visit the schools once in two weeks, as it was thought necessary, and the number was, therefore, increased to four. The two additional music supervisors appointed this year, are ladies.

I believe I am safe in saying that all the departments of our school system are in good hands.

In what might be termed the business department of our

school work, we have the following experienced, reliable and competent officers:—

James Y. Player, Secretary and Treasurer.

C. L. Hammerstein, Auditor.

Chas. B. Stark, Attorney; Wm. Bryan, Supply Agent;
H. Clay Sexton, Bailiff.

B. R. Singleton, Supt. of Construction and Repairs.

In the educational department, we are unusually well supplied with capable, efficient, and enthusiastic workers. The general supervision is in the able hands of Mr. Edward H. Long, Superintendent; Mr. Chas. M. Foster, Ass't Sup't; Mr. Louis W. Teuteberg, Ass't Sup't; Mr. Geo. T. Murphy, Ass't Sup't.

In special supervision, we have Mrs. T. E. Riley, Drawing Supervisor; Miss Mary C. McCulloch, Kindergarten Supervisor; Mr. Wm. Hodgdon, Music Supervisor; Mr. Egmont Froehlich, Music Supervisor; Mr. Caesar Bumiller, Music Supervisor; Mrs. Regina M. Carlin, Music Supervisor, Mrs. Eugenie Dussuchal, Music Supervisor.

Our High and Normal School, with Mr. F. Louis Soldan and his trained, scholarly assistants, calls for praise from all lovers of higher education.

I am especially pleased to report that our District Schools, where most of our children are taught, are conducted by conscientious men and women devoted to securing the greatest good to the largest number.

PUBLIC LIBRARY.

The object of a Public School Library is to supply pupils in the Public Schools with general reading, which is essential to the most elementary education and the likeliest inducement and the only means for the continuance of education after leaving school.

The idea of the founders of the St. Louis Public School Library was that if our children could have ready access to a good collection of books while in school, self-instruction.

through the Library would succeed to school instruction, which closes at so early an age. Interest on the part of teachers in inspiring their pupils with a taste for good reading was presupposed; and it was expected that all Library fees would eventually be abolished, so that self-instruction would be as free as school instruction.

It is because neither of these expectations have been fulfilled that the Library does not yet in any satisfactory degree supplement the work of the schools. It appears that not one in four of the teachers, and only one in fifty of the pupils of a reading age, in our schools, use the Library. The responsibility for this failure rests partly on the teachers and partly on the Board. The teachers evidently do not use our Public Library to any extent, and as a natural consequence they do not induce their pupils to use it. On the other hand, the Board does not in its examinations and its course of study give sufficient encouragement to work of this kind, which is most helpful because it renders school work attractive, and leads to a continuance of education after the too short school-days are over.

But it is in the power of the Board to do more towards making the Library serviceable in the education of the young. Without any incitement from the teachers, thousands of children would draw books from the Library if only it were made free and supplied with ample resources. The Board cannot spare the money for this purpose from its revenues; but it can accomplish the object just as effectually by taking advantage of the law providing for the establishment of free libraries in the cities of Missouri.

The control of the Library by another Board will not in the slightest degree affect the connection and co-operation of the Library with the schools. With an adequate income the Library will be able to do, and will do, ten times as much work in and for the schools as it can do under the present conditions. In my opinion, therefore, the Board

should encourage any movement to establish a free library under the State law ; and if at the next, or any succeeding election, the people declare in favor of a free library the Board should promptly turn over the present Library as a nucleus of the great Free Public Library which St. Louis should have, and which it can most surely and quickly obtain by compliance with the provisions of the law framed for that purpose.

Thus established on a broader basis, and entirely free, the Library would be of much greater benefit to the general community as well as to the schools. It would soon have five times the membership it now has, and would reach thousands of households in St. Louis, where now its existence is scarcely known.

It is a matter of surprise that so little is known of the Library among our older citizens, and that there has been so little substantial recognition of the excellent work it has done under unfavorable conditions. For twenty-six years it has served the public. With a small income it has accumulated one of the largest and best collections in the West, and has taken rank among the most active and progressive libraries in the United States. And yet in all this time it has received no gift of any magnitude either in money or books. No citizen has endowed it in his lifetime, or dying has mentioned it in his will. It is to be hoped that this record of neglect will soon be broken. It cannot be that an institution which can so safely challenge all others to a comparison of the dividends it pays on the investment, can much longer be overlooked by men and women who seek to do the greatest good with their surplus wealth.

Respectfully,

C. F. MILLER,

President.

ANNUAL REPORT OF THE SUPERINTENDENT.

OFFICE OF SUPERINTENDENT PUBLIC SCHOOLS, }
St. Louis, August 1, 1891. }

To the Board of President and Directors of the St. Louis Public Schools:

GENTLEMEN —I submit herewith the thirty-seventh annual report of the schools under your charge.

In this report will be found the usual amount of statistical matter which represents to some extent the growth and condition of the schools.

The following brief statement of the extent of the Public School system, under your management, is derived from the following summarized tables and statements.

There are in this system seventy-nine schools (exclusive of evening schools), occupying one hundred and eleven buildings. In these buildings there are nine hundred and seventy school rooms, containing fifty-three thousand, three hundred and fifty seats.

Some of our schools occupy two or more buildings located in the same yard or within the same city block. The largest school has twenty-eight rooms and occupies two buildings. The largest of our school buildings has twenty-four rooms.

Forty-three of these schools have kindergartens connected with them; these forty-three schools contain eighty-five per cent. of the enrollment in all the schools.

The kindergartens connected with ten schools occupy detached buildings for kindergarten purposes, located in the school yard or in the immediate neighborhood. In all other cases the kindergartens occupy rooms in the school

buildings; the kindergarten rooms are usually of the size of two ordinary school rooms. In six schools the children are allowed to attend kindergarten all day. In all other schools the children attend kindergarten only one-half of each day; but in these schools, except three, there are two sets of kindergarten pupils; one for the forenoon and one for the afternoon. Counting each of the six all-day kindergartens as one, it will be seen that we have seventy-seven kindergartens connected with the District Schools.

During twenty weeks of the year twelve free evening schools were in session three evenings of each week.

Sixty-three thousand six hundred and twelve pupils were enrolled in the schools during the year, and these were taught by twelve hundred and seven teachers, including principals and supervisors.

SCHOOL STATISTICS.

Population of the city of St. Louis June 1, 1890, 460,357.

School population, June 1 1885 (between the ages of six and twenty) :—

	WHITE.	COLORED.	TOTAL.
Male.....	52,611	2,445	55,056
Female.....	50,901	2,497	53,398
Total.....	103,512	4,942	108,454

Estimated school population, 1891.....123,078

Number enrolled in Public Schools (including evening schools)... 63,612

Number enrolled in private and Parochial Schools, about..... 25,000

Estimated number of persons of school age not enrolled in either

Public or Private Schools..... 34 466

The "school population" includes all persons between the ages of six and twenty.

The number of persons of school age not enrolled in either Public or Private Schools, includes those under twenty years of age who have withdrawn from school after completing a portion or all, of the work of

the District Schools as well as those under twenty years of age who have graduated from the High School and from private schools.

1889-90	35	17	10	7	5	5	4	5	5	5	100	3	76	62
1890-91	34	17	9	7	5	6	4	6	5	5	100	5	73	67

The above table shows the annual variation in items of attendance through a period of twenty-eight years. Seventy-three per cent. of the entire number of pupils enrolled during the year were not tardy a single time during the time of their enrollment. This item, together with the cases of tardiness, as shown in the last column, presents evidence that we have not improved in the matter of punctuality during the last year.

AGES OF PUPILS.

[See Appendix, Table III.]

Number of pupils 6 years old.....	7,860

1889-90.....	14	14	13	12	10	9	9	7	5	3	3	100
1890-91.....	13	15	13	11	11	10	9	7	5	3	3	100

From the preceding table it will be seen that we report no pupils under six years of age. In accordance with the law, children under six years of age cannot be admitted to the Public Schools. It is evident that in many cases the law is violated. The law provides no means by which to determine the ages of those applying for admission to the schools. There being no systematic or thorough registration of births the matter of determining the ages of children upon admission to school is left almost entirely in the hands of the parents.

There are many excellent reasons why children should be admitted to the kindergarten before they have reached the age of six, and it is for the best interests of the people that we urge definite and decisive action for the accomplishment of this purpose, either through legislative enactment or through constitutional amendment.

The number of pupils belonging in the respective grades at the close of each quarter during the last two years is

given in the above table. The average number belonging at the close of the quarter, for the year, does not vary materially from the average number belonging at any time during the year.

To obtain a basis for estimating and comparing the regularity of attendance, pupils are considered as belonging during all absences that do not extend beyond six consecutive half-days. At the end of six consecutive half-day's absence the pupil's name is "dropped" from the roll. This, however, is for statistical purposes only.

Since it is possible for all pupils belonging to be present at any time, the number of teachers to which a school is entitled is based upon the number belonging.

PER CENT. OF TOTAL NUMBER BELONGING AT CLOSE OF QUARTER.

The "whole number enrolled in the day schools" as given in the above table includes all pupils who have attended during any portion of the school year, that is, from the first Monday of September, 1890 to June 12th, 1891.

The enrollments of pupils received by transfer from some other school in the city, during the year, is not included in the enrollment for the school in which the transferred pupils have been received, hence, duplicate enrollments are not included in the "whole number enrolled."

The "average number belonging" has been explained under a preceding table showing the "number belonging at the close of each quarter."

The "average number of pupils belonging to each teacher" has varied but little during the last nine years. As a matter of comparative cost from year to year the "number belonging to each teacher" is an important one to notice, for the variation of but one in this number means an increase or decrease of one teacher to the corps of teachers for every time the average number belonging is contained in the average number of teachers in the entire corps. As indicated in the above comparative table, the apparently slight difference of one in the number belonging to each teacher produces a marked effect upon the items of expense.

In the Normal School twenty pupils are required to each teacher; in the High School, thirty; in the four higher grades of the District Schools, fifty; and in the four lower grades fifty-five. In most of the schools for colored children and in the suburban schools forty is the required number belonging to each teacher.

NUMBER OF SALARIES PAID.

Number of teachers in the District, High and Normal Schools, who receive the salary indicated in the left hand column.

a. The Teachers upon promotion shall receive the grade of salary next higher than that to which they were entitled before promotion.

b. Teachers who teach half day at separate schools to receive \$50.00 per annum extra, provided the schools are one mile or more apart.

CLASSIFICATION OF SCHOOLS.

As shown in the above schedule of salaries, by rank, the schools are classified as first, second, third, fourth, fifth, sixth and seventh class.

This classification of the schools does not depend upon the grade of pupils taught, but upon the number of teachers to which a school is entitled, and the number of teachers depends upon the number of pupils belonging.

A school entitled to eighteen or more teachers, ranks as first-class.

A school entitled to thirteen or more teachers, but less than eighteen, ranks as second-class.

Ten to twelve teachers entitles the school to the rank of third-class.

Eight or nine teachers entitles the school to the rank of fourth-class.

A school entitled to five or six or seven teachers is fifth-class; to four teachers, sixth-class; to less than four teachers, seventh-class.

Schools in sparsely settled districts, and most of the schools for colored children, are classified as follows:—

Schools entitled to four or more assistants, as third-class; to three or four teachers (including principal), as fourth-class; to two teachers, as fifth class; to one teacher, as sixth-class.

It will be noticed, as given in the above schedule, that teachers in our schools are given different ranks, the lowest in the District Schools being third assistants, and the highest, head assistant. Teachers of a higher rank receive higher salaries than those of the next lower rank.

All assistant teachers in the District Schools begin with the rank of third-assistant, though such as have had experience elsewhere and show themselves to be proficient, are given the salary of third-assistant corresponding to their years of experience.

Proficiency entitles any teacher to promotion to a higher rank, and when vacancies occur in the higher ranks, teachers from the next lower rank are promoted to these vacancies.

The number of second and first assistants to which a school is entitled depends upon the size of the school, or, in other words, upon the number of teachers to which the school is entitled by reason of the number of pupils belonging.

SUPPLY OF TEACHERS.

For several years our Normal School has graduated a sufficient number of pupils to fill all vacancies in the District Schools. High School graduation being the required qualification for admission to the Normal School, the Normal graduates are also necessarily High School graduates. •

Examinations are held in January and July of each year for applicants for positions as principals in the District Schools or assistants in the High School.

TEACHERS FOR THE KINDERGARTENS.

Those who desire to become teachers in the kindergartens, are admitted as "volunteer assistants," after having passed the required examination in the English Branches. These volunteer assistants learn the practical work of the kindergarten under the direction of the directors of the kindergartens to which they are assigned. In addition to this practical work, these volunteers meet in classes and receive instruction in the theory of the kindergarten methods, from competent instructors.

After completing the prescribed work of preparation, these volunteers are allowed to take the required examinations and if successful are given diplomas which entitle them to positions as paid assistants or directors of kindergartens, as the case may be.

Applicants for the positions of volunteer assistants in the kindergartens must be at least seventeen years of age.

THE NORMAL AND HIGH SCHOOL.

The number of pupils admitted to the Junior year of the High School during the year ending in June, 1891, was 571. Of this number, 266 entered from the District Schools in September on recommendations of the Principals of the District Schools, and 214 in February. Fifty-one were admitted from the District Schools during the year on examination and forty-one were admitted on examination from other schools. The total number of pupils recommended during the year for admission to the Junior year of the High School by the Principals of the District Schools was 698. It will be seen from the above figures that 218 of those recommended did not enter the High School, or, in other words, a little over 31 per cent., or nearly one-third, of the pupils who completed the work of the District Schools in a manner satisfactory to their respective Principals did not continue their school-work in our schools. A very small number of these did continue their studies in some institution of learning, but most of them discontinued their attendance at school altogether.

Pupils who complete the work of the District Schools are given a certificate of scholarship. This certificate seems to be the final aim of many pupils; and, doubtless, the awarding of this certificate results in securing the attendance of many pupils in the higher grades of the District Schools, that otherwise would leave school much earlier.

Pupils are admitted to the High School from the District Schools at the beginning and in the middle of each year. The ratio of attendance upon the High School has gradually increased, as a rule, from year to year since 1881.

In 1887 the first trial was made of the plan of admitting pupils to the High School upon the recommendations of the Principals of the District Schools in which the pupils completed the District School course. The standing of

the pupil in his classes in the High School seems, thus far, to act as a sufficient check upon a too generous regard for the pupils desired to be advanced to the High School without having succeeded in securing the necessary information and discipline. With but few exceptions, pupils who have been admitted to the High School under this plan have succeeded in performing the work assigned to them in as satisfactory a manner as when a formal examination was required for admission.

A carefully prepared record of the ability and standing of the pupils through the first half of the Junior year of the High School course, enables the principals of the District Schools to determine quite satisfactorily the value of the instruction and training that they have given their pupils as a preparation for the more advanced work of the High School.

The plan has proven so satisfactory that it has been incorporated in the rules governing the management of the schools, with, however, the proviso that the Superintendent may at any time order and conduct an examination of those about to be admitted upon the recommendations of the principals of District Schools.

The following report of the principals of the Normal and High School shows the growth of the school through a series of years, as well as the present condition of the school in many important directions: —

Mr. E. H. Long, Superintendent Public Schools:

SIR — I herewith submit the required report of the Normal and High School for the scholastic year, 1890-91.

Respectfully,

F. LOUIS SOLDAN,
Principal.

EVENING SCHOOLS.

The number of Evening Schools, as compared with that of last year, was increased by one polytechnic school and five preparatory schools. There was no change in the course of study and the conditions for admission were the same as for the preceding year. The enrollment of pupils was forty per cent. greater than for the preceding year, and the attendance was forty-eight per cent. greater.

For statistical purposes, the polytechnic and the preparatory departments have been kept separate in the tables given below, though a polytechnic and a primary department, under the same name, constitutes but one school. These Evening Schools were conducted in twelve different buildings.

Full statistical results of the Evening Schools are given in the following tables:—

SCHOOL FOR DEAF-MUTES.

In the report of the Principal of the school for deaf-mutes, given below, will be found a full statement of the success and condition of this school. I wish to call special attention to Mr. Cloud's statement with reference to the success of the teaching of articulation to deaf-mute children. This report is all the more gratifying because it acknowledges the success of an undertaking that was begun as an experi-

ment and with but little faith in the value of the proposed method.

Mr. E. H. Long, Superintendent of Public Schools:

DEAR SIR — In compliance with your request I submit the following report of the school for the deaf, now in the thirteenth year of its existence.

The enrollment for the year has been 34 — 18 girls and 16 boys — with an attendance of 29. Both enrollment and attendance this year are greater than during any of the three preceding years.

No pains have been spared in arranging and adapting a course of study suited to the special requirements of our pupils and in ascertaining and adopting the most approved methods of teaching. In this work I have been ably assisted by Miss Annie M. Roper, a successful teacher of six years' experience. The programme of physical culture prepared for the public school children is used in this school.

The teaching of articulation, begun in February of last year and necessitating the employment of a special teacher, is a success and should be continued. Miss Helen C. Vail, who first undertook the work and proved herself to be an excellent teacher, resigned her position last September on account of failing health. Her place has been acceptably filled by the appointment of Miss Pearl Herdman. With your permission Miss Herdman recently spent a short time studying the methods of teaching speech in the State School for the Deaf at Jacksonville, Ill.,—the largest and one of the best schools of its kind in the world.

A number of our pupils are members of the Public Library and greatly appreciate their privileges. Books are selected for them by their teachers, who also indicate, when necessary, what each should read. A Free Library would enable more to enjoy its benefits.

We smile at the statement of an old-time writer that

“ To instruct the deaf no art can ever reach,
No care improve them, and no wisdom teach,”

but there is no denying that even under the most favorable conditions the work of teaching the deaf is one of great difficulty. Recognizing this fact leading educators agree that the number of deaf pupils to each teacher should be limited to ten. In a prominent New England school the limit has been placed at eight.

For ease of access the location of this school in the Old Jefferson building, Ninth and Wash streets, could hardly be improved upon. A single car fare enables pupils to reach the school from almost every part of the city. The building, however, is old and sooner or later must be replaced by a new one. We accordingly recommend that *two* communicating rooms, instead of a single room as at present, be reserved for the use of this department, as it is highly desirable to separate, during school hours, the advanced and articulation classes from the primary and kindergarten grades.

In my last report I favored the establishing of a branch of this department, in connection with one of the colored schools of the city, for the benefit of colored deaf children. I renew and emphasize this recommendation and hope that the much needed branch may be ready when school re-opens next fall.

The kindness of the Board in granting our requests for maps, charts and other school room aids is hereby acknowledged and appreciated.

A remarkable case of recovery of hearing is recorded of a boy twelve years of age, who attended this school last year. In the summer of 1890 he suddenly lost his hearing from an attack of Raynaud's disease. The following

summer his hearing suddenly returned and he is now a pupil in the Webster School, where he attended prior to his affliction. An account of this remarkable case is given in the *St. Louis Clinique* for August, 1891, and in the *American Annals of the Deaf* for 1892.

Respectfully submitted,

JAMES H. CLOUD,
Principal.

THE DISTRICT SCHOOLS.

The comparative tables of statistics in this report show the usual annual increase in the enrollment and attendance in the District Schools.

The Kindergartens, now generally recognized as an essential part of our educational system, have met with their share of success and growth.

The changes that have been made in the course of study for the District Schools during the year are not very material. They relate more especially to history and biography in the middle grades.

It is generally supposed that in the schools of the larger cities there is too much prescription; that the teacher's success would be measured by far greater results, if she were allowed more freedom to work out her own methods, and that the pupil's advancement would be more rapid and his attainments more rational if more spontaneity of action were permitted. The constant tendency in educational methods is in the direction of one or the other of these two extremes. In matter and method, the teacher is either directed as to all the details, thus leaving no room for the exercise of her own judgment and ingenuity, or, on the other hand, she is left entirely to herself without any guidance or direction. It is desirable, if possible, to unite these two tendencies. The course of study must

direct largely as to the essential subjects that must be taught in order that the value of the limited school attendance of the masses be not rendered less valuable by desultory efforts and uncertain results. Where large numbers of pupils are yearly changing locations and thus repeatedly changing schools, some degree of uniformity in subject and method is necessary, otherwise great loss of time will result from lack of continuity of work. Prescription is necessary on the side of that which is considered the most essential; but, after the amount of arithmetic, geography, history, and reading that shall be taught has been prescribed in lists of subjects and in pages of the Readers, there is ample opportunity remaining for the full exercise of the teacher's desire to be, to a great degree, independent of the imposed prescriptions. In the subjects and material that may be used for language lessons; in the collateral information necessary to the full understanding of many of the reading lessons; in the numerous scientific, historical and biographical references that occur on the pages of the prescribed text-books, there is an abundance of material, if properly used, to make that which is prescribed sink into comparative insignificance so far as to its being a hinderance to the exercise of the independent activity of the teacher. Then too in the collection of pictures and cabinets of objects, for illustrating and making more vivid, interesting and useful the various prescribed subjects, is a work in which teacher and pupils can engage with but little cost, from a monied stand-point, but with incalculable gain as to results in awakened interest and untiring voluntary energy — results that put the prescriptions on which these efforts are based, completely in the background.

An awakening interest in special authors or in special works of authors, and the collection and use of school libraries, is a work that can be kept free from prescription

or direction by authorities higher than that of the teacher and her pupils.

School libraries have been established in many of our schools through the combined efforts of principal, teachers, pupils and patrons of the school. Funds for this purpose have been raised mostly through the annual picnics and partly by means of school concerts. As a rule, an annual concert given by the pupils of a school in some hall convenient to the neighborhood, meets with full and cordial support from the patrons and friends of the school, and results in substantial returns. As high as three hundred dollars, clear of all expense, has been realized from one of these neighborhood school entertainments. The benefit of these school libraries can be fully appreciated only by those who have had experience with the results obtained through the free access to books, by pupils in the schools, and under the direction of the teacher.

The use of *School and Home* for supplementary reading matter, in our schools, has been continued from year to year and has become an indispensable auxiliary in our school work in furnishing a variety in the combinations and uses of words for the primary grades, and much biographical, historical and scientific information as well as an outline of current events for all grades.

Many of our schools, too, have, through their own efforts, supplied themselves with full sets of models for individual use in drawing, and with scissors for cutting.

The only new feature in the department of drawing is the introduction of instruction in color in connection with decoration, and it, like all other new work, has been quite difficult for the teachers but very delightful for the pupils.

We began this study of color knowing that the only way to obtain a practical course was to intrust the work to our many efficient teachers.

We have an outlined course, it is true, because it is

necessary to have something definite upon which to work, but it has been understood from the first that this course is to be modified and changed until it becomes thoroughly practical.

During the year instruction in wood carpentry was introduced into the L'Ouverture School (a school for colored children) as an experiment. The funds with which this work was carried on at first were raised by private subscription, through the exertions of the Principal of the school. The privilege to use a portion of the basement of the school building for this purpose was granted by the Board. At first only bench work was tried and the simple use of the most ordinary tools in joinery was taught. Subsequently the Board made an appropriation sufficient to cover the cost for material and instruction for one year. Out of this appropriation additional tools and two lathes have been purchased, and wood-carving and turning have been introduced. We believe this experiment has demonstrated to us the value of instruction in the use of tools, in connection with the higher grades of the common schools. I give here the opinion of the Principal of the L'Ouverture School, Mr. O. M. Wood, with reference to the value of this work as carried out in his school :—

“I am pleased to report the success of our experiment in tool-culture in the higher grades of our school. After purchasing tools we constructed six double work benches, and for the trial, selected twenty-four boys from the sixth and seventh grades. This class was divided into two sections, each section working after school alternate evenings from half-past three to five o'clock.”

“Saturday mornings lectures have been given from time to time during the year, chiefly upon technical subjects, such as Timber, Tools, etc. Our work has been necessarily slow but we trust entirely thorough.”

“The following facts have been demonstrated to us fairly and clearly: that tool culture backed up by a thorough public school course will furnish the strongest mental culture and mental discipline; that manual training stimulates interest in school work, cultivates manliness, self-reliance and earnestness; that it teaches order, system and method; that it develops intellectual vigor in the highest degree; that, together with the ordinary school work, it develops every side of the boy's nature.”

“Though this work has been pursued outside of regular school hours and therefore not compulsory, our boys have taken the deepest interest in it. I am importuned daily for permission to work in the shops at noon time and at recess.”

The room in which this work has been performed is not suitable for such purpose, there being neither sufficient space nor sufficient light. It is hoped that this work may be continued and that more suitable quarters may be provided in the near future.

In conclusion I desire to express my appreciation of the earnest and faithful efforts that have been made by supervisors, principals and teachers for the success of our schools.

Respectfully,

EDWARD H. LONG,
Superintendent.

THE PUBLIC LIBRARY.

REPORT OF THE PRESIDENT.

To the Honorable Board of President and Directors of the St. Louis Public Schools:

GENTLEMEN — One question is forced to the front this year, and an answer to it cannot long be delayed. We believe the response to it will be in the affirmative. The question is raised in the report of your President. It is reiterated in the remarks of the Librarian: *Is St. Louis to have a free Public Library?*

The new Library building is well under way. Everything will be in readiness for the public by the autumn of 1892. Shall a subscription fee stand between that public or any part of it and the 80,000 books on the Library shelves — books bought with the people's money? For every taxpayer in our city has contributed to build up this institution.

It will be asked, doubtless, how is the Library to be made free? To my mind the reply is to be found in the Missouri Library law, passed by the General Assembly of the State in 1885. This act provides that upon the petition of one hundred tax-paying citizens, legal notice having been given, the people of St. Louis may, at any regular annual election, vote to tax themselves one-fifth of a mill on a dollar annually to establish and maintain a free Public Library, to be under the control of nine directors appointed by the Mayor.

As the matter now stands the School Board appropriates

\$14,000 of the public money, which it needs for its own uses, and which is wholly inadequate to the demands of the Library; and for the rest of its revenue it depends principally upon membership fees, which, in effect, exclude large numbers from its privileges, and usually those who need its benefits most.

This proposition for a free Public Library for our city, should, as soon as practicable, be brought to the test of a popular vote. And if this special act of the legislature is not worth less than the paper on which it is printed we believe that we shall be speedily delivered from the doubtful reputation of being the only first-class city in the country without such an institution. It is too late now to argue for the wisdom and usefulness of free libraries. Mr. Crunden gives instances in his report of the esteem in which they are held by a far-seeing public policy.

Nearly \$3,000 is at present derived to the Library from membership fees, which with fines (\$1,065.08) and the income from "duplicates" (\$765.65) brings the whole amount available for Library purposes up to less than twenty thousand dollars (\$19,337.25). Let any one who is interested compare this with the revenue raised in Chicago, Cincinnati, Minneapolis, or Omaha.

It only remains for me to congratulate the Board on the efficient and harmonious working of the Library service under Mr. Crunden's charge. The Librarian and his assistants have had no higher object than to make the most of the means and instrumentalities intrusted to their hands. With enlarged resources, it is safe to say, there would be enlarged usefulness. What the tax-payers or any generous donor puts into the Library will prove a good investment for St. Louis.

Respectfully submitted,

JOHN C. LEARNED,

President of the Board of Managers.

REPORT OF THE LIBRARIAN.

To the Honorable Board of Managers of the St. Louis Public Library:

I have the honor to present herewith my Fourteenth Annual Report for the year ending June 30th, 1891, with some statistics and a partial record of work and progress up to March 1st, 1892.

The following table, with the Treasurer's report, gives a complete exhibit of the

RECEIPTS AND EXPENDITURES FOR THE YEAR ENDING JUNE 30, 1891.

DR.		CR.	
To Life Memberships.....	\$168 00	By Salaries	\$10,923 80
Temporary Memberships...		Books, Reg. Lib.....	\$3,795 07

	\$20,203 67		\$20,203 67

* As an illustration of the necessary increase of general expense with the growth of an institution, it may be noted that the item of insurance is nearly \$300 in excess of last year, and more than \$600 greater than it was six years ago.

REPORT OF THE TREASURER.

PUBLIC LIBRARY, ST. LOUIS, July 1, 1891.

To the Hon. Board of Managers:

The undersigned Secretary and Treasurer of the Board of President and Directors of the St. Louis Public Schools, said Board being the depository of the funds of the St. Louis Public Library, respectfully submits the following report of the receipts and expenditures in the Library fund for the year ending June 30, 1891:

Balance in Treasury June 30, 1890.....	\$	807	90	
Amount deposited by Secretary Public Schools...		14,000	00	
Amount deposited by Librarian Public Library...		5,387	25	
				\$20,145 15
Amount paid out on warrants.....				19,308 74
Balance in Treasury July 1, 1891.....				\$886 41

Respectfully submitted,

JAMES Y. PLAYER,

*Secretary and Treasurer Board of President and Directors
St. Louis Public Schools.*

MEMBERSHIP.

During the year 813 new members were enrolled. The gain in the last six years is shown by the following table:—

MEMBERSHIPS IN FORCE.

	July 1, '85.	July 1, '91.
Perpetual memberships.....	47	47
Life "	3,899	*4,010
Beneficiary life "	101
Honorary "	31

Temporary "	979	1,585
Totals.....	4,925	5,964

* Of these only 2,396 are in actual use.

NEW MEMBERSHIPS ADDED AND OLD MEMBERSHIPS RENEWED.

YEAR ENDING JUNE 30, 1891.

Life memberships:

Subscription.....	33	
School directors.....	8	
Beneficiary.....	12	48

Temporary memberships:

Subscription.....	1,951	
Kindergarten.....	195	
Honorary.....	21	2,167
Total.....		2,215

The first of the foregoing tables shows that the number of paying members has increased from 979 in 1885, to 1,585 in 1891.

ADDITIONS TO THE LIBRARY.

The total number of books catalogued and placed on the shelves during the year, was 3,288. Full particulars regarding these will be found in the following tables:—

CLASSES.	Regular Library.	Collection Duplicates.	TOTAL.
Philosophy.....	39		39

Total additions			3288
Less above			572
Net increase.....			2716

Of the 485 volumes worn out 246 were replaced by new copies and of the 43 volumes lost and paid for, 21 were so replaced.

Among the purchases of the year were a considerable number of costly and valuable publications obtained chiefly from auctions at very low prices. The most noteworthy addition is Scaramuzza's Illustrations of Dante's Divine Comedy, one of very few copies, if not the only copy, in the United States. Among other acquisitions of importance are the following:

Album du Salon. 1840-42. 3v. 4°.
 Anderson. Pictorial Arts of Japan. f°.
 Burnet. Practical Hints on Color in Painting. 4°.
 Burnet. Practical Hints on Composition in Painting. 4°.
 Martin. Histoire de France. 17v. 8°.
 Mollet. Illustrated Dictionary of Art and Archæology. 8°.
 Moore. Gothic Architecture. 8°.
 Nicolay & Hay. Abraham Lincoln. 10v. 8°.
 Palacky. Geschichte von Böhmen. 7v. 8°.
 Perrot & Chipiez. History of Art in Sardinia, Judea, etc. 2v. 4°.
 Salon de 1883. 4°.
 Scaramuzza. Illustraz. sulla Divina Commedia di Dante. 4v. Obl. f°.
 Turner Gallery. 2v. 4°.
 Von Falke. Art in the House. 4°.
 Whitaker. Art Treasures in England. imp. 8°.

Further progress has been made towards completing sets of periodicals by the purchase of 227 volumes. All these were secured at reasonable prices, and some decidedly

below market rates. The advantageous terms on which purchases have been made is indicated by the fact that, including such costly works as the Scaramuzza and others noted above, the average cost per volume of the 2,261 volumes bought was only \$1.68.

EXCHANGES AND DONATIONS.

During the year 781 volumes and 1,419 pamphlets were received as exchanges and donations. A complete list, with the names of the donors, will be found in an appendix. The more noteworthy gifts were 127 volumes from Mr. Chas. H. Turner, a former member of the Board, 128 volumes and 73 pamphlets from Mrs. Minor Merriwether, 50 volumes from Mr. W. W. Eayrs, 24 volumes from the New York State Library, and 17 volumes from the Pennsylvania State Library. The Library is under obligations to Hons. S. W. Cobb, J. J. O'Neill and Nathan Frank for U. S. documents. Mr. John M. Gilkeson has continued his Christmas gifts of library memberships to deserving boys and girls; and several employers have followed the same plan in choosing holiday presents for the young people in their employ. There is certainly no other way in which the expenditure of \$1.00 can confer so great a benefit on a boy or girl.

Citizens of St. Louis might do much towards building up the Library by occasionally sending in books which have served their purpose at home and others which have no place in a private collection but would be of great value in a public library.

Persons interested in the various charitable and other institutions of the city should see that their annual reports are regularly sent to the Library, which would thereby become a complete repository of local history.

This Library has one distinction which is not an enviable one or creditable to St. Louis. It is, I think, the only

large library in the country that has received no gifts of any importance either in money or books from private sources. This, I suppose, is its reward for having got along on so small a public appropriation, for to him that *hath* shall be given — not to him that *needs*. The Boston and Chicago Public Libraries, with their hundred thousand and more per annum and their millions for buildings, receive valuable gifts and bequests. The St. Louis Public Library is left to do the best it can on \$14,000 a year. And yet it must be evident to any one who will investigate the subject that there is no other institution that makes so large a return to the city for the money spent in maintaining it.

“ Donation has been the source of the principal Libraries which have ever or anywhere been founded. It is not easy to conceive that a benevolent and enlightened citizen can leave a more pleasing or lasting monument behind him than a donation of books to a public library, constituting a department on which his name might be inscribed as a benefactor, not only to his own times but to future ages.”

CONTENTS OF THE LIBRARY.

A necessarily hasty count gives the following approximation to the contents of the Library, July 1, 1891 :—

Philosophy.....	965
Theology.....	2,804
Social and political sciences.....	12,021
Natural sciences and useful arts.....	10,805
Art and poetry.....	5,128
Fiction.....	11,333
Juvenile.....	4,660
Literary miscellany.....	4,990
Geography and history.....	11,105
Cyclopædias and magazines.....	7,794

71,605

Collection of Duplicates.....	927
South Branch.....	1,988
Total of entered books.....	74,470
Unentered duplicates (about).....	2,500
Total contents.....	76,970

The above figures, it should be noted, represent the number of books actually in possession of the Library at the given date, not the number the Library has had. Additions to the first of March bring the total up to about 79,000. We shall probably have 80,000 volumes to remove to the new building.

BINDING.

The aggregate expense for binding is slightly in excess of the amount reported last year; viz., \$1,162.90 to \$1,124.58. This includes 976 volumes (periodicals and books in paper covers) bound for the first time, costing \$595.35, an average of sixty-one cents per volume, and 1,600 volumes rebound at a cost of \$567.55, an average of thirty-six cents per volume.

In the middle of the year was inaugurated the successful experiment of employing a trained binder's assistant to repair books in the Library. In the seven months that come within the period of this report she repaired 1,336 volumes at a salary expense of \$175, an average of thirteen cents per volume. Many of these would have required re-binding at a cost of more than five times that sum. As a result of this work the collection is in better condition than it has ever been before.

CIRCULATION.

The total issue of books and periodicals shows a gain of 15,767 over the previous year and a gain of 60,939, or twenty-four per cent., in the last four years. The particulars are given in the following tables:

ISSUE BY MONTHS.

FOR THE YEAR ENDING JUNE 30, 1891.

	Home Use.	Library Use.	Periodicals.	Total.
July.....	9,425	4,394	5,098	18,917

Washington's B'day.	434	261	396	1091
Total.	639	896	962	2497

Issue at Branch Library 4539, a loss of 783, or nearly 15 per cent. as compared with last year.

Of the Branch issue 499 volumes were drawn from the main library.

The Library was open every day in the year. 1206 notices were mailed to members from the issue department: 712 for books overdue; 190 for memberships expired; 118 informing members of books reserved, and 186 calling attention to new books supposed to be of special interest to the persons addressed.

Eighty-two books were sent for and forty-seven recovered; \$1.30 was expended for car fare; \$1.00 collected in messenger fees.

CHARACTER OF THE READING.

In my last report I gave abundant statistical proof of the steady rise in the standard of the books issued both for home reading and for use in the library. The most striking facts noted were the decrease in the last eight years of the percentage of fiction drawn for home use from sixty-two to fifty-two and one-half, and the increase in the percentage of cyclopædias and magazines used in the reference department from 5.11 to 15.41 and of social science from 4.92 to 11.2. Considerable space was also given to showing the relative popularity of leading novels at various periods. These comparisons have proved very interesting; and I hope to repeat them in the near future. Great changes may be reasonably predicted when the Library is made free.

A comparison of this year's percentages with those of last year shows scarcely any variation. A very slight falling off in novels and juveniles and in philosophy and theology is balanced by a corresponding increase in social and natural sciences and history. It is within the last few years that the remarkable growth of interest in social and political science became manifest. In my report of 1888 I noted among books used in the rooms a decrease of 16 per cent. in novels and 33 per cent. in juveniles (good books and read to a surprising extent by adults) as compared with the preceding year; while at the same time there was an increase of 50 per cent. in the use of cyclopædias, and nearly 100 per cent. in works on social and political science.

That readers who use the free reference department do not come to the Library merely for entertainment, is proved by the following facts. A shelf above the library issue desk is always full of books placed there at the request of readers who are unable to finish them at a sitting and who

give notice that they will call for them again the next day. A glance at this shelf from time to time would convince any one that a considerable amount of solid reading is done by persons who, presumably, cannot afford to pay for the privilege of taking books home. In support of this statement I submit below a record of the books that remained on the shelf from day to day during the winter months of 1891-2. This list furnishes sufficient evidence that the free department of the Library is sought for purposes of instruction. These books, be it remembered, were not simply consulted, but read through by men and boys who came evening after evening for that object.

BOOKS RESERVED FOR USERS OF FREE REFERENCE DEPARTMENT.

DEC.-FEB., 1891-92.

Philosophy.

- | | |
|---|---------------------------------------|
| Denton. The soul of things. | Scott. Methods of ethics. |
| Hartmann. Philosophy of the unconscious. | Sterling. Text-book to Kant. |
| Kant. Critique of pure reason. | Watson. Kant and his English critics. |

PERIODICALS.

Attempts to present with any exactness a classified exhibit of the periodicals read are necessarily futile because of the miscellaneous character of most periodicals. When the *Electrical World*, or the *North American Review*, or *Forum*, or *Engineering and Mining Journal* is drawn, we know what sort of reading the applicant is after; and if all

periodicals were as homogeneous as these, classification would be easy. But who can tell what the reader wants who calls for *Harper's* or *Scribner's Monthly* or the *Century*? That the *Scientific American* was issued nearly 4,000 times and the *North American Review* 1,500 times last year, is evidence of interest in practical science and in the social and political problems of the day. The general standard of periodical reading is in some measure indicated by the following tables showing the issue of the most popular periodicals for the year ending June 30th, 1891.

Harper's Weekly.....	5,515	Scribner's.....	2,388
Puck.....	5,105	Ueber Land und Meer.....	2,159
Leslie's Illus. News.....	4,504	Youth's Companion.....	1,713
Judge.....	3,990	North American Review.....	1,500
London News.....	3,967	St. Nicholas.....	1,015
Scientific American.....	3,806	Forum.....	944
Harper's Monthly.....	3,746	Popular Science Monthly.....	853
Century.....	3,561	Vom Fels Zum Meer.....	816
Life.....	3,175	Electrical World.....	735
Golden Days.....	3,092	Engineering & Mining Journal.....	618
Leslie's Popular Mo.....	2,416	Revue des deux Mondes.....	522

An attempt at a rough classification of periodicals is presented in the following table: —

READING-ROOM ISSUE CLASSIFIED.

	Issue of Periodicals.	Per cent.
Philosophy.....	43	.04
Theology.....	966	.88
Social & political sciences.....	33,832	30.67
Natural sciences and useful arts.....	16,958	15.37
Art and poetry.....	509	.46
Juveniles.....	7,501	6.80
Literary miscellany.....	19,794	17.93
Geography and history.....	444	.40
Miscellaneous.....	30,283	27.45

THE LIBRARY AND THE INTELLECTUAL LIFE OF ST. LOUIS.

In my last two reports I gave considerable space to setting forth the relations of the Library to the intellectual life of the city. The increasing percentage of the issue of instructive books shown by the statistics of the past few years is undoubtedly due in a considerable degree to the intellectual stimulus of organized effort, to the various clubs for study which have developed rapidly in numbers and membership and in the variety of the subjects taken up. During this winter reference lists have been furnished to clubs and classes for the study of Russia past and present, Spain and the Moors, life and writings of Emerson, Socialism, and various other topics.

The largest of these is the Wednesday Club, which marks a distinct advance in bringing together many of the most intelligent and active women in the city, and showing them the incitement, the development and the power that lie in organization. The high intellectual aims of the club may be seen in a glance at its programs, which I have embodied in my last two reports; and the demands made upon the resources of the Library are evidence of the thoroughness with which the work has been done. The club has already accomplished much intellectually: its possibilities as a social force in St. Louis are beyond calculation.

The Unity Club, under the direction of Rev. J. C. Learned, has devoted the winter to the study of Emerson's life and writings: the program of the Eliot Society consisted of character studies from Shakespeare; and a large class under the leadership of Rev. Dr. Holland has discussed various phases of the sociological problem.

For purposes of illustration, and as a record of the intellectual activity of the city, which the Library subserves and stimulates, I give again the programs of the largest clubs.

WEDNESDAY CLUB PROGRAM, OCTOBER 14, 1891, APRIL 28, 1892.

Conditions of literary productiveness.
 A critical study of Schiller's dramas.
 Balzac's place in fiction.
 The rise and fall of romanticism.
 Poetic and philosophic art criticism.
 Typical forms of German music.
 General discussion of club work.
 The new education.
 Women in science.
 Treatment of criminals.
 A century of discovery.
 Comparison of English and American governments.
 The Germany of Bismarck.
 Cavour and united Italy.
 International law.

PROGRAM OF THE ELIOT SOCIETY, DECEMBER 22, 1891,
 MAY 5, 1892.

CHARACTER STUDIES FROM SHAKESPEARE.

Types of Manly Worth.

Antonio (Mer. of Ven.); Prospero (Tempest).

Maidenhood.

Isabella (Meas. for Meas.); Viola (Twelfth Night); Perdita (Win. Tale).

Wit and Humor.

Falstaff (Hen. IV.); Dogberry (Much Ado About Nothing).
 Bottom (Midsummer Night's Dream.)

Ambition.

Wolsey (Henry VIII.); Richard III.; Macbeth.

Wives.

Desdemona (Othello); Queen Katharine (Henry VIII.); Lady Macbeth.

Lovers.

Romeo; Orlando (As You Like It); Othello.

Parents.

Constance (King John); Volumnia (Coriolanus); King Lear.

Malevolence.

Shylock (Merchant of Ven.); King John; Iago (Othello).

Sons and Daughters.

Coriolanus; Cordelia (King Lear); Hamlet.

The Supernatural.

Caliban (Tempest); Fairies (Temp.; Mids. N. Dream).

Witches and Ghosts (Macb., Hamlet and Julius Cæsar).

THE LIBRARY AS A BUREAU OF INFORMATION.

A full record of the calls made upon the Library for information and assistance in the course of a month or a week, would astonish any one who has not worked in a library, by its length and varied character. Such a record it would be impossible to keep, under present conditions, because Librarian and assistants pass from one thing to another so continuously (often waiting on two persons at once) that when a break comes at the end of hours of constant work, memory fails to recall the various wants that have been supplied. As a very inadequate illustration of the varied demands that are made upon the *Library Bureau of Information*, I give below a few wants and questions noted at odd times during the past year. If a full record were secured, a single month would show a greater number and probably an equal variety. The list might be readily enlarged by including all the topics in the foregoing club programs. The list appears under three heads: subjects of study on which reference lists have been furnished, books or articles wanted on given topics, and questions asked. Beyond this rough classification there is no attempt at order of any kind. The items in each group are given at random, just as they were originally noted.

REFERENCE LISTS FURNISHED.

George Elliot's Spanish Gypsy.

History of Spain during the time of the Moors.

Ralph Waldo Emerson.	The Shakers.
Balzac.	Capital Punishment.
Dante.	Euripides.
The Lake Poets.	Socialism.
Single Tax.	Mortar and cements.
Longfellow.	Building and plans for houses.
Plato.	Woman in science.
Aristotle.	Æschylus.
The Madonnas.	The modern drama.

BOOKS OR ARTICLES WANTED.

- Where may full statistics of Colorado be found?
 Where shall I find some pictures of fishes?
 What is the best work on chess?
 The letter of Columbus announcing his discovery.
 The best book on bricklaying.
 The best book on metal cornices and other metal work.
 Proofs of the resurrection of Christ other than the statements of the Bible.
 A sketch of the Railroad King of Mexico.
 A bird's eye view of St. Louis.
 Some portraits of Columbus.
 A price list of postage stamps.
 A book which would identify a certain German coin.
 Some designs for fancy alphabets.
 Information about the St. Louis Post Office and Government Building.
 Something on Municipal government in Missouri.
 Arguments on the negative of the question: "Resolved that the British rule in Asia has been favorable to Christian missions."
 Something about the last years of the life of James Russell Lowell.
 Information regarding the domestic life of George Washington.
 A book on Brook Farm, written a few years ago by a woman.
 Farmers' Almanac 1791-1840.
 Information regarding the towns and cities of Indiana.
 Something on present French art (school of Millet).
 The Illinois laws of corporations.
 An article in some recent magazine on the mendicant society at Paris.
 Something on compulsory education.
 A picture of the "sleeping Ariadne."
 Some pictures from which to get some idea of a design representing commerce.
 Some books on Theosophy.
 Something on the laws regulating boarding-houses, which will decide the question whether trunks may be put into the street.

- Photographs of Egyptian views.
- A book on English surnames.
- A photograph of the Rosetta stone.
- Something on the development of British naval architecture.
- A description of the rainbow.
- Something on copper working.
- A drawing of the planetary system.
- A work on screw propellers.
- Illustrations of the story of Elijah.
- Something on the last war in the East Indies.
- A description of coins.
- "The latest German translation."
- The best work on dentistry.
- Something on the antiquities of the Aztecs.
- A portrait of Queen Victoria.
- An illustrated treatise on landscape painting.
- A biographical sketch of Emma Abbott.
- A sketch of the life of George Bancroft.
- A criticism of "Ben-Hur."
- Something on the hanging gardens of Babylon.
- Something on the history of printing.
- A criticism on Longfellow.
- Something on the protective tariff.
- An argument on the temperance question against prohibition.
- Something about Keshab Chunder Sen.
- Who were the Queen's prime ministers?
- Something on the Holy Grail.
- A book on the building and sailing of yachts.
- A book on trotting horses.
- Books on electricity for boys. (Numerous calls.)
- A book from which a boy can learn all about the planets and constellations.
- A book on the building of barns, spring-houses and other farm out-houses.
- A list of the poets and prose writers of America.
- Some text-book on universal business warehouse book-keeping.
- The book of Plato in which he treats of the greatest good from the universal stand-point.
- Something on the removal of the body of Napoleon from St. Helena to Paris.
- Something about coffee houses in the time of Addison and Swift.
- Something on the use of money in politics.
- Some ghost stories
- A cut of the golden rod for a jeweler's designer.
- Something on the Nicaragua canal.

Something on the Galveston harbor.
Commercial statistics of New York and St. Louis.
Something on the New Madrid earthquake.
Two or three of the best cook-books.
The best book on etiquette.
A book on the future of the English language.
Something on the laws of divorce in the different States.
A book which circulates containing biographical sketches of Godard and Raff.
Something containing Winter's poem entitled "After All."
One book containing short sketches of the lives of all the early American statesmen.
Something on the manner of procedure in French court trials.
Books and articles on the controversy between the Pope and King in Italy, especially the Catholic side.

QUESTIONS ASKED.

The correct text and source of such quotations as: "Music of the spheres" and "Books in brooks."
What character in Dickens made a will at the age of twelve?
Who was called the "young doctor of Rome?"
Who wrote the first book published in America?
What artist destroyed a painting of Raphael?
What can you tell me of Thomas R. Atchison?
What is the best history of the English language?
What are the names of the editors of the leading newspapers of the United States?
Who is the best commentator on Shakespeare?
Who is called the "wisest of men?"
Who was the "last of the barons?"
Who invented masques?
Who is called "that mighty orb of song?"
What decides Easter?
What was the first cook book ever published?
What is "the new meaning of the Roman?"
Who was called "his sowship?"
Who uses the expression: "Full orb of song?"
With reference to whom was the "Full orb of song" used?
Who is the greatest living English historian?
Who is the greatest living American historian?
Where shall I find a picture of an olive plant?
What was the population of St. Louis in 1840?
What was the origin of St. Valentine's day?

Where may something describing the death of C. L. Vallandigham be found?

Is Hugo's drama entitled "Cromwell" translated into English?

What were the real causes which led to the Lutheran reformation?

Who was the greater general, Washington or Wellington?

Who was the greater novelist, George Eliot or Charles Dickens?

What is romanticism?

Is De Lesseps dead?

What is De Lesseps' full name?

What was Dante's attitude toward the papacy?

Is there a book called the "Book of the Dead?"

What is the French, German, Italian, Latin and Greek for the words "oil" and "anti-explosive?"

What is rubberine?

Is Asa Gray dead? If so, when did he die?

Who is the author of a book entitled "The Friend of Death?"

Where can I find the proportions of a perfect woman?

Was the story of Lucille original with the author? If not, where did he get it?

A Latin motto for a medal to be given a young lady proficient in music.

Sentiment for a toast at a Masonic supper. Such as would be suitable for an address commemorative of the death of a distinguished man.

Price of *Oeuvres de Boileau des Preaux*; Ed. of 1798.

Also of *La Lusiade*; Ed. of 1765.

THE LIBRARY AND THE SCHOOLS.

Down to recent times the library was for the scholar only. Without neglecting the wants of the student class, the modern public library has entered wider fields and assumed broader and more varied functions. None of these is more important than its work as a supplement of the public schools; and there is no subject that has received greater attention from librarians. Ways and means for making the library useful in the schools are frequently presented in the *Library Journal*, are discussed at every Librarians' conference, and form a topic of constant correspondence among librarians. In reply to frequent inquiries from other cities as to what our Library is doing in the public schools, I am obliged to confess that it is very little. By a count some years ago it was ascertained that not more

than one-fourth of the teachers in the schools had memberships in the Library. Out of nearly 30,000 pupils (over nine years of age) in the public schools only 671 are now (April, 1892) ticket holders; and in private and parochial schools the ratio is still less. There are two reasons that combine to account for this. One is the ever-present obstacle of a membership fee: the other, almost, if not quite, an equal factor, is the failure of our teachers to realize the help to them and their pupils that lies in good literature. Some regard general reading as a positive interference with school work; and the mass are apparently indifferent. If the Library were free, it is fair to assume that a great majority of teachers would avail themselves of its privileges; and there can be no question that thousands of children in and out of school would gladly seize the opportunity thus offered for their instruction and entertainment. But even under present conditions the usefulness of the Library to our young people could be multiplied fivefold by reasonable effort on the part of teachers. That general literature is a help, not a hindrance, to school training, my own experience as a teacher convinced me; and this conviction has been confirmed and strengthened by the testimony of the most active and progressive teachers and by the results of co-operation between schools and libraries in various parts of the country.

In proof of the fact that it lies in the power of teachers, in spite of the membership fee, to make this Library a valuable adjunct to the schools and in support of my position that collateral reading is a help to their regular work, I submit the results of an experiment tried under adverse circumstances by Mr. O. M. Wood, Principal of the L'Ouverture colored school. His eighth-grade class this winter consisted of thirty-one pupils from thirteen to sixteen years of age, all the children of poor parents. He induced twenty-eight of these to devote a dollar each,—

earned by carrying coal, clearing snow off sidewalks, scrubbing doorsteps and other similar work, — to the purchase of a Library ticket. Then obtaining from the Library a list of the best books for his purpose, he formed a reading-club, which has met alternate Fridays after school for discussion of the books read. Questions are asked by the teacher; and if in his opinion the first critic of a given book does not fairly bring out what is in it, the same book is assigned to another member for further criticism. Two accessions to the club have come from last year's pupils now attending the Sumner High School. By inquiring at the Library Mr. Wood has kept himself informed as to the books drawn by his pupils; and he has found that scarcely any books outside the list recommended have been asked for. But a full statement of the experiment and its results can be best given in Mr. Wood's own words:

ST. LOUIS, MO., March 24, 1892.

DEAR SIR: In response to your inquiry concerning the Reading Club, formed by pupils of the eighth grade in this school, I have the honor to reply that the experiment is an unqualified success. The unanimous verdict of both teachers and pupils is, that much lasting benefit has been derived from the careful, systematic reading that the children have been pursuing in the past year. Quiet, earnest, methodic system has taken the place of random stuffing; and a positive taste for the best class of literature is slowly and surely being formed. Perhaps I could not illustrate this better, than by relating an instance which came under my notice. One of my boys, a bright little fellow and a greedy reader, stood at a lathe in the Manual Training room, during the noon hour, turning an exercise. Across from him another little classmate was working on a wood carving. "What are you reading now?" said the turner. "Dick Deadeye," said the carver. "Trash — a waste of time," sententially returned the other. "Oh, well, you needn't talk, you just stopped reading that trash since you joined the Reading Club." "That's so!" coolly rejoined the first, "But my reading is not only interesting, but it teaches me something beside." Just then a warning from the monitor broke in and the conversation ceased. That youngster expressed our highest aim in the formation of the club. Interesting reading which is instructive, attractive literature which is safe. Briefly stated our club plan is this. Each pupil on joining the club pays \$1.00. For this he is given a library membership for one year, and a list of books on ethics, science, history,

travels, geography and fiction. These subjects admit of a wide range and free scope, yet every volume is carefully selected for a specific purpose, bearing directly or indirectly upon school lessons and the pupil's life work. A few selections just here will illustrate: Abbott—History of William the Conqueror, Blaikie—How to Get Strong and How to Stay So, Creasy—Fifteen Decisive Battles, Coffin—Boys of '76, Hartwig—Polar World, Hawthorne—Tanglewood Tales, Fiske—Washington and his Country, Hughes—Tom Brown at Rugby, Meadowcroft—A B and C of electricity, Reid—Afloat in the Forest, Sewell—Black Beauty, Stevens—Around the World on a Bicycle. These are random selections from the list. Additions are made from time to time and we keep pace with current literature. Fortnightly talks on books read stimulate interest and encourage deeper and more careful reading. Every pupil, upon the completion of a book, files a slip with questions similar to these.

QUESTION SLIP.

- I. Name of book.
- II. Author.
- III. Kind.
- IV. Principal character.
- V. Other characters.
- VI. Plot of the story.
- VII. Value of the work.
- VIII. Remarks.

File with Principal when book has been completed.

The fact has been forced upon me through frequent discussions with the club, that children are the keenest and most merciless critics, and now and then I have gleaned some pretty bright ideas from this work. I inclose specimen slips. Our chief trouble lies in the transition period. To take the average boy from "Big-foot Wallace, the Terror of Lone Gulch," and introduce him to Nordhoff's "Politics for Young Americans," would "settle Hoti's business." We must go at the matter with tact. We supplant "Billy the Grizzly," with Du Chaillu's "Wild Life Under the Equator," follow it with Reid's "Afloat in the Forest," step by step leading the boy and allowing him to realize that there is a definite aim and a well defined motive in reading. Step by step then he goes on encouraged to go higher until he is proud to select the highest grade of books for himself. When once the habit is formed, trust the boy for the rest, and observe with pride the development of the man. From our list of one hundred volumes the club has discussed over twenty this year, many of the members have read a greater number than this, and some pupils have read fewer books. Outside the list the boys of the Manual Training Department have read technical works which they have noticed in the Library catalogue. The influence of this work

has been made apparent through all the channels of development. My pupils have been wiser, stronger, purer and nobler. And from this year's experiment with thirty pupils in the eighth grade, we shall certainly extend the good work next year to include the fifth, sixth and seventh grades. We are greatly indebted to Mr. J. F. Davies of your corps, for valuable assistance in the compilation of our Reading list, and for many hints and suggestions.

Very respectfully yours,

O. M. WOOD,
Principal L'Ouverture School.

The account of the experiment would not be complete without samples of the formal written reports that have been presented on books read. I therefore append five specimens. The original papers have an interest which is lost in a typographical reproduction. Suffice it to say that in all of them writing and punctuation are good; and in nearly all the spelling is perfect.

1. Name of book. Tom Brown's School days.
2. Author. Thomas Hughes.
3. Kind. Fiction.
4. Principal character. Tom Brown.
5. Other characters. Schoolmates East and Arthur.
7. Plot of story. A sketch of a boy's life in an English school.
7. Value of the work. It has a strong value for its influence on the minds and morals of children.
8. Remarks. I consider this one of the best books I ever read. The hero shows himself to be a boy who will undoubtedly make a fine man.

1. Name of book. The Prince and the Pauper.
2. Author. Samuel L. Clemens. (Mark Twain.)
3. Kind. Fiction.
4. Prin. character. Tom Canty.
5. Other characters. Prince, King Henry VIII., Tom's father, Earl of Hertford, Sir Richard Hendon and others.
6. Plot of story. The plot of the story is an exchange of lives and stations and experiences by a prince and a pauper.
7. Value of the work. The book is valuable for its insight into English history; the manners, customs and dress of the people of England.
8. Remarks. The book is enjoyable although the idea is preposterous and could not occur in actual life.

1. Name of book. Nicholas Nickleby.
2. Author. Charles Dickens.
3. Kind. Fiction.
4. Principal character. Nicholas Nickleby.
5. Other characters. Godfrey Nickleby, Wackford Squeers, the Yorkshire schoolmaster, Ralph Nickleby, Vincent Crummles and others.
7. Value of the book. Its ethical value. It treats of life in England among the lower classes. The story is a beautiful one, and is told in a very beautiful way.
8. Remarks. I consider this story by far the best story of English home life that I have ever read. The story is a strong condemnation of the neglect of education in England, and the brutality which characterized the boarding schools of a certain period. The story will bear reading and re-reading.

1. Name of book. How to Get Strong and How to Stay So.
2. Author. Blaikie.
3. Kind. Physical culture.
6. Plot of story. To teach a person how to take care of the body.
7. Value of work. It teaches a person how to become strong and have good health.
8. Remarks. We need laws for the development of the body. Good health produces longer life. It has been said that Americans take too little exercise; but our colleges are paying attention to games. Exercise to be of any benefit must be taken regularly. Girls do not have enough exercise of the proper kind. It is not regular and therefore of little or no value. I do not believe in home gymnasiums because practice will not always be taken at a regular time, something else will come up and we forget the practice. The school is the right place for physical culture, because you can take regular exercise at regular times. I like outdoor games better than all.

1. Name of book. A B C of Electricity.
2. Author. Meadowcroft.
3. Kind. Science.
7. Value of the work. Great.
8. Remarks. Great for the reason that electricity is rapidly coming into play as the motive power, and wherever it can be used it is gradually taking the place of steam. Every one should know something about this wonderful agent that is revolutionizing trade and commerce.

I have presented this experiment somewhat *in extenso*, because it has the value and vividness that come from nearness of observation, and because success has been achieved

in the face of two special obstacles,—the membership fee and the poverty of the children. Numerous illustrations might be cited of the work done in other cities where the conditions are made more favorable by the existence of a free library. Mr. S. S. Green, Librarian of Worcester, says:

“I remember making an estimate of the average number of volumes from the Free Public Library in use in the schools of Worcester daily during two of the busiest months of the winter term, and finding it to be 1,666. That number was, of course, additional to that of books taken out on cards held by individual boys and girls and to such as were used in the building.”

It would require too much space to present even an outline of the arguments in favor of making the reading of good books a part of the regular work of schools. These, together with suggestions as to methods and records of results actually achieved, have been fully set forth by leading educators (teachers and librarians) throughout the United States and Western Europe. Annually for twelve years Mr. James M. Sawin, a grammar school principal of Providence, R. I., has published a graded and annotated list of books for young people from six years of age to maturity. Every volume of the *Library Journal* contains more or less on the subject; and nearly every phase of it, hortatory and expository, may be found in a little book published by F. Leypoldt in 1883, entitled, “*Libraries and Schools*.” Of the six papers that make up this little volume four are by librarians: one is by a Boston grammar school principal and one by Charles Francis Adams. Ignoring the librarians, whose utterances may be discounted as coming from bigoted reformers who are satisfied with nothing that is, or selfish schemers who want to glorify their office, I quote from the teacher, Mr. R. C. Metcalf, who, after giving an account of his methods, adds:—

"I am convinced that supplementary reading can be made a powerful auxiliary in aid of our regular school work. This is especially true of history. The exercise in general reading soon enables the pupil to reproduce, in a few minutes, with the utmost ease, what heretofore has required much laborious study."

I know of no other teacher who is so ardent an advocate of this method in education as Miss Mary E. Burt, formerly teacher of English literature in the Cook County Normal School, and now a member of the Chicago Board of Education. Her writings* contain such a body of convincing argument, stirring exhortation and apt illustration as can be found, I think, nowhere else. The cogency of her presentation comes from the fact that it embodies the practical experience of twenty years in the schoolroom. The same idea may be found in the utterances of President Eliot, Edward Thring and other progressive educators. To repeat a quotation from the *Springfield Republican*, which gives a sententious summary of my position, "The liking for a good book is of vastly more consequence to youth and manhood than a knowledge of the equation of payments or adverbial elements of the third form."

To the question that is not unnaturally asked by teachers, "Where is the time to come from for this work?" Edward Thring replies: —

"Great interest will make up for want of time. Create great interest. As soon as children can read, throw away all lesson books for a time. Let them read. Let them read aloud — really read, not tumble through pages. Give them to read poetry, the lives of good men, narratives of noble deeds, historical stories, historical novels, book of travel and all the fascinating literature of discovery and adventure. A person who has once learned to read well

* "Literary Landmarks," 1889; "World Literature," 1890, and various addresses and magazine articles.

is tempted to go on. And such books, selected by a carefully graduated scheme, would supply endless knowledge, whilst kindling the mind, without any waste of time from drudgery and disgust. Geography, history and power of speech are all comprised in such books, if properly used."

Prof. W. P. Trent, of the University of the South, in a letter to "The Nation," answers the same objection: —

"I shall be told that the number of studies is too great already; but I reply that it is a thousand times better for a boy to be familiar with 'Marmion' than for him to be able to draw a map of Cochin China, or to calculate the tenth power of nine in his head. It is fair to say that an hour spent on good poetry will be worth the six hours now spent on the average public school course."

L. E. Wolfe, our able and energetic State Superintendent, learned from his experience as a teacher the value of good literature in popular education; and he is making most earnest efforts to provide every school-house in Missouri with a collection of suitable books, which he has taken great pains to select.

The New York State Teachers' Association has appointed a Committee on Literature as one of its standing committees. "The Committee will devote itself to the cultivation in our young people of the taste for good literature: its present 'plan of campaign' is to increase and multiply in every way the child's opportunities for reading the best books. As an initial step the Committee proposes to issue a little pamphlet in which an effort will be made to classify some of the works of literature according to the standards of grading now in current use in the schools, and thus furnish to teachers a list of literary masterpieces which can either serve as reading matter for their classes, or be used as alternates with the regular reading books of the grade.

“Such a list of books has already been prepared; and it is now deemed advisable to subject this list to an extended comparison with other lists for the purpose of perfecting it, and also of including in it as many additional books as may be practicable.

“The great practical importance of such a graded list must be recognized by every parent, teacher and librarian who has given the matter any serious attention.”

It was to accomplish this work on an extended scale that “The National Young Folks’ Reading Circle” was organized May 1, 1888, and incorporated October 1, 1889. Its object, as stated in the prospectus, is “the promotion of good reading among our boys and girls.” Its managers and counselors include prominent superintendents, teachers and librarians in various parts of the country. It sends to members every fall a list of books adapted to each of three grades; “Junior” (children 12 years old and under), “Middle” (children 13 to 16 years of age) and “Senior” (youths and adults). For each grade there is recommended a list of books in History, Science and General Literature. Great care is taken that the books shall be the best of their kind, which implies that they shall be interesting as well as instructive. The Circle already has a considerable membership covering about two-thirds of the States in the Union; but it would be ten times as great if parents generally realized what it can do for their children. The pride of membership in a large organization is in itself a stimulus to child or adult; and a definite undertaking is a great utilizer of the scraps of time.

I am impelled to quote further in support of my thesis that what our schools most need is the greater interest that would be furnished by the study of good literature.

President Eliot, of Harvard University, says: “Teaching in American schools and colleges has been chiefly driving and judging; it ought to be leading and inspiring.”

Dr. Thomas Hill, his predecessor, gives the following from his own experience:—

“The books which help a man most are those he reads in childhood. Had I not in 1824 read ‘Eyes and no Eyes’ in my ‘Evenings at Home,’ I should not in 1835 have taken up Beck’s Botany with such zeal as to carry me morning after morning at daybreak, even in June, to search for wild flowers, carrying in my pocket a card sundial made by myself from directions in Rees’ Cyclopaedia, to insure getting back to my apothecary shop in time to open and sweep it.” He adds: “From seven to twenty I was an omnivorous devourer of all sorts of books.”

Sully’s “Psychology for Teachers” contains, among other matter of a similar character, the following paragraph:—

“The habitual narration of stories is an essential ingredient in the rudimentary stages of education. The early nurture of the imagination by means of good wholesome food has had much to do with determining the degree of imaginative power, and, through this, of the range of intellect ultimately reached.”

And Sir John Lubbock says:—

“The important thing is not so much that every child should be taught as that every child should wish to learn. A boy who leaves school knowing much, but hating his lessons, will soon have forgotten all he ever learned, while another who has acquired a thirst for knowledge, even if he had learned little, would soon teach himself more than the first ever knew.”

In a paper on “The Function of the Library and the School in Education,” read at the 1890 Conference of the American Library Association, Dr. W. T. Harris shows clearly the necessity of the library as a complement of the school.

“The school,” he says, “gives the preliminary prepara-

tion for education; and the library gives the means by which the individual completes and accomplishes his education."

And again:—

"I think our national system of education, or the system and methods generally prevalent in the United States, is destined to be vastly improved by the efforts of librarians."

Mr. James Richardson, an ex-President of the School Board and for many years President of the Library, has constantly advocated the introduction of literature as a part of the regular curriculum of our common schools; and no one who knows his successful business career of more than forty years in St. Louis, would think of calling him a doctrinaire.

Here are the views of another practical man. In an address to the teachers of Quincy, Mass., delivered some fifteen years ago and republished in the little volume edited by S. S. Green, to which I have before referred, Charles Francis Adams ably advocates a closer relationship between the public library and the public school. A few paragraphs will serve to show the spirit and purpose of the address.

"The one best possible result of a common-school education,—its great end and aim,—should be to prepare the children of the community for the far greater work of educating themselves."

He condemns "a system which brings a community up in the idea that a poor knowledge of the rudiments of reading, writing and arithmetic constitutes in itself an education. On the contrary, the great end of the common-school system is something more than to teach children to read: it should, if it is to accomplish its mission, also impart to them a love of reading.

"Our educational system stops just where its assistance might be made invaluable,—just where instruction ceases to

be drudgery and becomes a source of pleasure. What I want to suggest to you grammar-school teachers is that it is in the power of each one of you to introduce a great spirit of improvement into your schools and at the same time the greatest pleasure and interest a true teacher can have into your own lives.

“ I want very much indeed to see our town Library become a more living element in our school system, — its complement, in fact. *Neither trustee nor librarian — no matter how faithful or zealous they may be — can make it so*, for we cannot know enough of the individual scholars to give them that which they personally need and which they only will take. You cannot feed them until you know what they like; and that we, in dealing with the mass, cannot get at. You teachers, however, can get at it if you choose.”

I have italicized the sentence above, because it sums up the situation. The work lies with the teacher. The personal care required devolves upon him; and to him comes the personal reward, the incomparable satisfaction of feeling that he has done what nobody else could have done in developing the latent capacity of many a young mind and in giving to society at least a few men and women of exceptional ability and usefulness. In this great work the librarian can co-operate; but the initiative lies with the teacher. Thus far overtures for a combination of effort have come mainly from librarians. Principal Metcalf says: “ My experience teaches that there is a greater degree of readiness on the part of librarians to serve the schools than of teachers to accept such service.”

PROGRESS — THE NEW BUILDING.

In the absorbing prospect of new quarters other improvements seem insignificant. Yet mention should be

made of the fact that the revision and rewriting of the card catalogue has been begun, and that some progress has been made towards the preparation of an index to portraits. The latter numbers so far about 2,500 cards and has already proved useful.

The corner-stone of the new building was laid October 2, with appropriate ceremonies, an account of which will be found in an appendix. The general plan of the building was mentioned in my last report; and a full description can better be given when the new quarters are completed and occupied. It may not, however, be out of place to speak of some of the principal features.

At the head of the list of essentials which I gave to the architect in the very outset were placed light and ventilation. Of these he promises there will be no lack. The rooms will enjoy comparative freedom from dust; but unless something is done to abate the smoke nuisance, the annoyance and damage from that source will be greater than ever.

Three features which promise great satisfaction to those who use the library are the large, well-lighted study-room, which will contain the bulk of the reference books, the "Teachers' Department," where classes may assemble for the consultation of books under the direction of their teachers, and a space in the delivery room for the display and unrestricted examination of all new books added to the collection.

THE TECHNOLOGICAL DEPARTMENT.

With an ample fund the "Technological Collection" can be made one of the most useful departments of the library. Twenty thousand dollars is required to supply this department with the best books in the productive and mechanic arts. One thousand of this is offered by one man. Several others have promised \$100 each. The bulk

of the fund is still to be raised. I do not hesitate to say that there is no other way in which the outlay of \$20,000 would do so much for the material and intellectual progress of the city. The chief boast of the nineteenth century is the wonderful progress of applied science, the marvellous improvements in transportation, communication and manufacture. Further advances must be based on a knowledge of what has already been accomplished. If we want our mechanics and inventors and scientific investigators to give St. Louis the prestige and profit of new inventions and better methods, we must secure for them access to the world's record of progress. Brain power is mightier than steam: an idea may possess greater force than the strongest dynamo, and be of more value than a mountain of silver.

Works on technology are very costly and in the aggregate beyond the purchasing power of individuals. One book in a public library will serve many persons, illustrating the principle of the "multiplication of utility" which Jevons presented as one of the strong arguments for public libraries. What a waste for each of ten men to buy a \$40 book which he needs to read but once, or consult occasionally, when one copy would have done for all, leaving the remaining \$360 for the purchase of other works on the same subject!

SHALL THE LIBRARY BE FREE?

The Library Act of 1885 authorizes the citizens of St. Louis to levy a tax of $\frac{1}{8}$ of a mill for the establishment of a free public library. This tax would yield \$40,000 to \$50,000 a year. This would be only eight to ten cents from each inhabitant. Is there any other way by which that amount of money would produce as great results? The School Board has shown an earnest desire to give the people of St. Louis the benefit of a free library. The only.

reason for hesitation or delay is the question whether the additional appropriation required can be spared from the school revenues. For a while, with some sacrifice of growth, the Library could be maintained as a free library on an income of \$25,000 a year; but for its proper growth and maintenance the full amount accruing from the fifth-mill tax is required. The question as to the availability of the state law should be settled at once; and if a legal obstacle exists, it should be removed as soon as possible by a charter amendment. The sooner a beginning is made, the earlier will the end be accomplished.

It is not beyond the bounds of hope that the solution of the problem may be hastened and simplified by private munificence. Grounds for such hope may be found in the fact that \$25,000,000 has been given for founding and endowing public libraries in the United States in recent years. Such gifts are reported with increasing frequency. Within the last year, besides numerous gifts of less note, Mrs. Hazard has saved her uncle's, Governor Tilden's, will from entire defeat by voluntarily giving \$2,000,000 of her share of the property for the establishment of a free library in New York; and Andrew Carnegie has increased his fund for the Pittsburg Public Library to \$2,100,000 this being the fifth library he has founded or endowed. True benevolence consists in helping people to help themselves; and it is generally recognized that the most efficient way to accomplish this is to educate them in youth. In recent years thoughtful people have begun to realize that the public library is a necessary complement of the public school and, beyond the barest rudiments, the most efficient instrument for popular education. It is truly the "Peoples' University," with innumerable elective courses adapted to every age, condition and aim in life. No one who can read is too young or too ignorant to matriculate; no one so old or so wise as not to gather further wisdom and instruction. It is

a realization of these facts that has turned philanthropy toward the public library as the most powerful agent of social amelioration ; the institution that can reach and benefit all the people and, in its universal service as a public educator, become the surest foundation of law and order. To quote again from the autobiography of the bootblack who became a minister through the inspiration and the aid of the Boston public library : —

“The Public School finds a eulogist in every candidate for popular favor. I, too, could speak well of the public school. But when I am asked how I obtained my start in life, I shall always answer, ‘Through a Public Library.’ ”

THE FREE LIBRARY MOVEMENT.

THE EXAMPLE OF MASSACHUSETTS.

Massachusetts, the pioneer in so many important movements, has taken the lead in free libraries. It has long had the distinction of including within its borders more than half of all the public libraries in the Union.* It was the first State to establish, two years ago, a Free Public Library Commission, in which step it was immediately followed by New Hampshire. The first report of this Commission, published February 1, 1891, begins with the following interesting and significant statement :—

“This collection of facts relating to the free public libraries in Massachusetts has been made for the purpose of showing what facilities for the free use of books are available to the citizens of each town and city in the Commonwealth, and to record the generous gifts of individuals

* Query: Is there any connection between this and the fact that Massachusetts has more savings banks than any other State in the Union, and, except New York (which it greatly exceeds pro rata), five times as many depositors as any other State, and more than ten times the number possessed by several States of greater population? Is there not here the reciprocal action of cause and effect?

for the foundation and maintenance of libraries and the construction of library buildings. The simple record is one that needs no comment. In 1839, the Hon. Horace Mann, then Secretary of the Board of Education, stated, as the result of a careful effort to obtain authentic information relative to the libraries in the State, that there were from ten to fifteen town libraries, containing in the aggregate from three to four thousand volumes, to which all the citizens of the town had the right of access; that the aggregate number of volumes in the public libraries, of all kinds, in the State was about 300,000; and that but little more than 100,000 persons, or one-seventh of the population of the State had any right of access to them. A little over a half century has passed. There are now 175 towns and cities having free public libraries under municipal control, and 248 of the 351 towns and cities contain libraries in which the people have rights or free privileges. There are about 2,500,000 volumes in these libraries, available for the use of 2,104,224 of the 2,238,943 inhabitants which the State contains according to the census of 1890.

“The gifts of individuals *in money*, not including gifts of books, for libraries and library buildings, exceed *five and a half million dollars*.

“There are still 103 towns in the State, with an aggregate population of 134,719, which do not have the benefit of the free use of a public library. These are almost without exception small towns, with a slender valuation, and 67 of them show a decline in population in the past five years. The State has taken the initiative in aiding the formation of free public libraries in such towns; and it is hoped that this statement of facts may lead those who are natives of, or have an especial interest in, these towns, to do for them what generous benefactors have wisely done for so many other towns in the Commonwealth.”

The report contains photogravures of sixty-eight free library buildings recently erected. Of these forty-eight are gifts, four bequests, six partly gifts and nine built by appropriations from towns or cities. These figures are a pretty plain indication of a growing desire among wealthy men to enjoy the noble usufruct of philanthropy in this life, — as well as the increasing realization of the fact, to which I have before alluded, that giving free access to good books is the best way to help people to help themselves.

“ Silver from the living
Is gold in the giving:
Gold from the dying
Is but silver a flying:
Gold and silver from the dead
Turn too often into lead.”

The second report of the Commission shows the work accomplished during the year in reducing the number of towns without free libraries from 103 to 66, “so that about four and one-eighth per cent. of our people are now without this blessing.” *With more than 95 per cent. of the people enjoying access to free libraries, is it any wonder that nearly 50 per cent. of the entire population, men, women and children, have deposits in savings banks?*

THE FREE LIBRARY IN ENGLAND.

Appreciation of the value of public libraries is not confined to Massachusetts, or to the United States. New Hampshire's lead, in enacting in 1849 the first statute for the establishment and support of free town libraries, was immediately followed by the English Free Public Libraries Act in 1850. Massachusetts came next in 1851. The first library established under the English law was at Manchester in 1852. Manchester is very little larger than St. Louis; yet its Public Library contains more than 200,000

volumes, and issued last year more than a million and a half books, while visitors to the newspaper rooms alone exceeded three million.

The Sunday visitors reached an aggregate of 263,309; and the books used in the rooms on that day numbered 139,292, nearly twice as many as we cannot report for all the days in the year.

The lack of civic pride and unity of action, which comes from its unwieldy size, long deprived London of the advantages of the Free Library Act; but once awakened, the giant is moving forward with enormous strides. Until 1886 nothing was done. In that year four parishes adopted the act. By December, 1891, the number was increased to 29; and now there are 30 free libraries and branches in London possessing over 250,000 volumes, and issuing over 3,000,000 volumes per annum.

In Paris the movement began in 1878 and has been even more rapid. There are now more than 60 free libraries, which last year issued nearly 1 1-2 million volumes. Examples could easily be multiplied indefinitely; but enough have been cited in this and previous reports to illustrate the force of Col. Higginson's comparison of the modern library and the mediæval cathedral. "Nothing," he says, "comes so near the great impulse which built within less than a century the vast European cathedrals as the impulse which is dotting our land with public libraries."

The *Boston Advertiser* closes a column editorial with these words:

"Thus is the public library one of the grandest of educators, the spread of which more and more is raising our country daily higher and higher in the plane of civilization. No money is wasted which is expended from the public purse in enhancing its value and its effectiveness."

In the foregoing report, besides furnishing the statistical information required by the rules, I have endeavored to

indicate the scope and character of the work accomplished by the Library, the spirit in which that work is done and its importance to the community. I have also tried to point out the beneficent possibilities that lie in this Library when it shall receive an adequate support and be made entirely free to all the people of St. Louis. A united and determined effort on the part of your honorable body and the Board of Public Schools, I am sure will accomplish the end which recent action and utterance has shown to be the unanimous desire of the members of both boards.

With thanks for renewed evidences of appreciation and confidence, and with firm belief that the near future will see the realization of our hopes and aims, I have the honor to be

Faithfully yours,

FREDERICK M. CRUNDEN,

Librarian.

April 8th, 1892.

APPENDIX NO. I.

DONATIONS JULY 1, 1890 — JUNE 30, 1891.

781 volumes and 1,419 pamphlets were received as exchanges and donations from 377 sources as follows:—

APPENDIX NO. III.

EXERCISES AT THE LAYING OF THE CORNER-STONE OF THE
BOARD OF EDUCATION AND PUBLIC LIBRARY BUILDING,
ST. LOUIS, FRIDAY, OCTOBER 2, 1891, FOUR O'CLOCK, P. M.

At the meeting of the Board of Public Schools, March 10, 1891, Mr. McEntire offered the following resolution:—

In order that the laying of the corner-stone of the Board and Library building may be carried out with that ceremony which an occasion of the kind demands,

Be it Resolved, That the President of this Board and three of its members, to be appointed by the President, in

conjunction with three members of the Library Board, arrange a suitable program for the occasion aforesaid.

In accordance with this resolution committees were appointed as follows: from the School Board, President Miller and Messrs. Walter F. McEntire, Jack P. Richardson, John M. Dutro; and from the Library Board, Messrs. O. L. Whitelaw, T. A. Meysenburg, Geo. O. Carpenter, Jr., and Frederick M. Crunden. These two Committees forming a joint Committee of Arrangements, held several meetings, agreed upon a program suggested by Mr. McEntire, and appointed Messrs. McEntire and Crunden a Committee on Program with power to settle all details and make all arrangements necessary to carry out the exercises.

Cards of invitation were sent to all ex-members and officers of the School and Library Boards individually; collective invitations were sent to the Merchants' Exchange, Mercantile Club, Faculty of Washington University, teachers of Public Schools and other bodies; and citizens generally were invited through the press.

The chorus of five hundred boys, selected from the grammar schools and drilled by Directors Hodgdon and Bumiller, together with a platoon of the L'Ouverture cadets, assembled at the Polytechnic building. Accompanied by their Principals and headed by the band they marched to the new building. They were followed by the officers and members of the School and Library Boards marshaled by Chairman McEntire. Three hundred chairs were provided for persons presenting cards; and besides these a large throng in the rear and filling the sidewalks listened to the following

PROGRAM.

Music — Band.

Opening Prayer — Very Rev. Philip P. Brady, Vicar-General Catholic Arch-diocese of St. Louis.

Chorus — Public School Pupils.

Address — Richard Bartholdt, Member of the Board of Public Schools.

Laying of the Corner-stone — * Hon. Stephen D. Barlow.

Music — Band and Chorus.

Address — Rev. J. C. Learned, President of the Public Library.

Closing Prayer — Rev. Montgomery Schuyler, D. D.

Chorus — National Anthem, "America," Public School Pupils.

Music — Band.

On a page of the program, opposite the order of exercises, appeared the following: —

THE BOARD OF PUBLIC SCHOOLS.

The Board of President and Directors of the St. Louis Public Schools was organized in 1833. Its first President was Mary P. Leduc, who held that position until 1840. The first Superintendent of Public Schools was Geo. K. Budd, who served gratuitously during the year 1839.

The first Public School was opened April 2d, 1838. In 1841 three schools were in operation. Now, 1891, there are seventy-nine schools occupying one hundred and five buildings, with a total enrollment last year of 64,584 pupils.

The receipts of the year ending June 30th, 1891, amounted to \$1,293,955.26, and the total expenditures were \$1,279,672.01.

The chief source of the Board's revenue is a four-mill tax on the real and personal property of St. Louis. Of late years this has proved insufficient to meet the demands of a school population that increases in a larger ratio than the taxable wealth of the city. In order to erect additional school buildings and to replace buildings out of date, it is proposed to levy a special tax of one mill for one year for building purposes.

* Mr. Barlow (then President of the Public Schools and a member of the legislature), obtained the Charter of the Library and was its first President.

THE PUBLIC LIBRARY.

On the 9th of December, 1865, the Public School Library Society opened its collection of 1,500 volumes in rented rooms on the southeast corner of Fifth and Olive streets. In April, 1869, the Library was transferred to the Board of Public Schools; and in the same year it was removed to the Polytechnic building. In 1884 the name was changed from *Public School* to *Public Library*.

The first Librarian was John J. Bailey, who was succeeded in 1877 by the present incumbent.

The collection now contains nearly 80,000 volumes, covering in fair proportion every department of knowledge. Last year 197,620 books and 96,831 periodicals were issued to readers and students.

The Library is free for reference purposes. Full privileges of membership are offered to all residents of St. Louis at \$2 a year.

After a selection had been played by the band, Mr. Chas. F. Miller, who as President of the School Board, presided over the ceremonies, announced that the exercises would begin with a prayer by Father Brady.

The remarks with which Father Brady prefaced his prayer and the invocation offered by him were as follows: —

REMARKS AND PRAYER BY VICAR-GENERAL BRADY.

My Fellow-Citizens:

We are assembled here this afternoon to witness the simple but very significant ceremony of laying the cornerstone of the new and needed Public Library building.

The program prepared by the Committee requests that the exercises begin with a prayer. Permit me to say, that on the present occasion this is at it ought to be. “*Nisi Dominus aedificaverit domum, in vanum laboraverunt qui*

aedificam eam.” Unless the Lord build the house, in vain do they labor who build it. This is the case with ordinary houses. But a Public Library building, as you easily understand, is no ordinary building. When we look at yonder magnificent structure — the Custom House and Post-office of the United States — we consider not so much its granite and its architecture and its cost, as we consider its useful purposes and the mighty Government which it represents. This building is to be interesting, not because of its great height, and fair proportions, and comfortable compartments, but for the grand uses for which the tax-payers of our city intend to set it apart. The home and the school are the foundation, the Public Library should be the superstructure of the education of a community. Our greatest men have been self-educated men. Public libraries tend to increase the number of the self-educated. The quality of books, and not their quantity, constitutes the valuable Library. The city’s morals to a great extent, depend upon the city’s literature. An ambitious man was he who dared to say that if he had the writing of a nation’s songs he did not care who made its laws; what would he have done if he had the composing of a nation’s books! Books which lead men to God, the Fountain of Wisdom and the Source of Knowledge. Books which teach men why they should love and help their fellow-men. Books which enlighten and strengthen the minds of men. Books which enlarge and fire the hearts of men, these and such as these are the books which make the great Library. That the Public Library of St. Louis may be a great and useful library is our prayer this afternoon. Let us therefore place ourselves in the holy presence of God, and in spirit and in truth let us pray: —

O Lord, Almighty and All-Wise, we prostrate ourselves in Thy presence. We thank Thee, for Thou hast blest us in many ways. As a people we have ungratefully and often offended Thee — we beg Thy pardon. As long as we live

here below, and it may not be long, we need Thy help, hence we implore Thy assistance on this day, we ask Thee to bless this work. Bless, O Lord, these foundation walls, and their chief corner-stone. Bless the superstructure. Bless its completion. Bless the workmen and preserve them from all danger. Bless the books which will find a resting-place in this building — the books healthful to mind and heart. Bless the guardians of good books. Bless and guide the pens of the makers of literature. Bless and enlighten and warm the intellects and hearts of the readers of books — so that, in consequence of this Public Library, to Thee, O God, may be still greater glory, and among men, still greater peace and better will. Amen.

After the singing of the “Red, White and Blue,” by the chorus, Mr. Richard Bartholdt delivered an address as the representative of the Board of Public Schools.

After a few words of welcome to the assembled guests and of thanks for the interest they showed by their presence, Mr. Bartholdt referred to certain divisions that had existed in the School Board and said that in spite of many differences of opinion on other subjects the work of erecting this building had united the sympathies and efforts of all members of the Board, and it would stand as a symbol of the good fruit that was ripened by the sunshine of harmony.

After dwelling upon the significance of the building as the mainspring by which all the delicate and complex machinery of the school-system was kept in motion, or the central sun which held the planets in their places, the speaker exhorted his hearers to take an active interest in school elections, the most important in the Republic, and not to allow the schools to be wrested from the hands of their friends, and fall into those of their enemies. In conclusion the orator said:—

“Every true friend of the cause of public education—and loyalty to American institutions requires such friend-

ship — will join me in the fervent wish that the great building to be erected over the corner-stone we lay to-day may forever be the home of honest, incorruptible men, a temple of progressive American thoughts, a palace worthy of the great and good city of St. Louis, and a monument worthy of the great cause to which it is devoted.”

President Miller then read the following brief account of the inception and progress of the work of erecting the building:—

“ At the regular meeting of the St. Louis School Board held May 12, 1889, the following was offered:—

“ ‘ Whereas, this Board owns unimproved and unleased real estate in the city and county of St. Louis, belonging to the Permanent Fund, worth at a fair estimate, at least \$300,000, producing no income whatever; and since a fire-proof building is imperatively needed to preserve the Public Library and records belonging to the Board, and to save insurance against loss by fire, in the central business portion of the city; and whereas, the Benton School property, on the northwest corner of Ninth and Locust streets, now owned by the Board, is a most excellent location for the Library and offices, as well as for business purposes; and it being the opinion of intelligent real estate and business men that said property, in the near future, will be worth double what it is worth to-day; and whereas, the same is now offered for sale by the Board at a sum not less than \$127,500, being \$1,000 per front foot on Locust street; and whereas, a fire-proof building similar to the new Mercantile Library, built by the Board upon said property would not only be centrally located for Library, Board room and office purposes, but, when built and ready for occupancy, would yield a permanent income of at least 5 per cent. per annum upon the cost thereof, as it would belong to the Board and being occupied for Library and school purposes would not be subject to taxation; therefore

“ ‘ *Resolved*, That it is the sense of this Board that said property should be withdrawn from sale, and that the Board should sell enough of its unleased, unimproved and vacant property belonging to the Permanent Fund, and with the proceeds erect a suitable fire-proof building thereon — say, seven stories high, the top one for Library purposes and the one next to the top for Board room and office purposes, and the five lower stories for business purposes, thereby creating a permanent paying investment out of the proceeds of property which is now unproductive.’

“ This being referred to the proper committees, they recommended the sale of certain lands, the proceeds of which to be used for the erection of a fire-proof building on this lot.

“ Believing that a sufficient sum would be realized from this sale of land, the School Board, on the 14th day of January, 1890, decided upon the selection of Mr. Isaac S. Taylor, the well-known architect, to prepare suitable plans for the building. Mr. Taylor having had ample time, spared no pains, freely consulted with the officers of the Board, with the Librarian of our Public Library and with the Building Committee. He prepared a most excellent plan, also specifications; they were submitted in their completeness to the committees, by whom they were reported to the Board on the 24th day of February, 1891, and unanimously adopted, and on the 14th day of April, 1891, the contract to erect the building was awarded to Messrs. Anderson Bros.

“ Credit is especially due for the inception of this work, for the intelligent manner in which it was brought to the Board, for the sagacity shown in providing ‘ways and means,’ to one of the most modest, yet one of the strongest members of the Board, a staunch friend and supporter of our schools, I refer to Mr. Wm. Koenig.

“ The foundation of this building is laid — we are now

assembled, members and ex-members of our Board and of the Library Board, patrons, scholars and fellow-citizens, for the purpose of laying the corner-stone of a building which is to be used largely for public free education."

Secretary Crunden read letters of congratulation and regret from ex-Presidents James Richardson and F. N. Judson and announced the following contents of the copper box to be deposited in the corner-stone:—

CONTENTS OF BOX.

1. Last City Directory. (Presented by Gould Directory Co.)
2. Charter of the City of St. Louis.
3. Last Mayor's Message and list of City officers.
4. Organization and membership of Municipal Assembly.
5. Last Annual Report of Board of Public Schools.
6. Last Annual Report of Public Library.
7. Rules and Regulations of School Board.
8. Rules and Regulations of Library.
9. Copy of program, etc., relating to the laying of the Corner-stone.
10. City papers published Friday, Oct. 2d, 1891.
11. Engraving of the new building.
12. Cut of Polytechnic Building, and lithograph of Ames Hall.
13. Business cards of I. S. Taylor, Architect, and Anderson Bros., Builders.

President Miller then announced that the corner-stone would be laid by Hon. Stephen D. Barlow, who obtained the Charter of the Library and was its first President. A handsomely plated and engraved trowel and hammer, furnished by Simmons Hardware Co., were handed to Mr. Barlow by Chairman McEntire.

Mr. Barlow reported the performance of the part assigned to him in these words:—

"Mr. President:

"I am pleased to announce that the work of placing the corner-stone of this important edifice, which is being constructed for the use of the Board of Education and

of the Public Library of the City of St. Louis, is now completed. And I beg you to accept my congratulations that the work of providing for these important purposes has been so auspiciously commenced. And it is to be hoped the inhabitants of the City of St. Louis may ever appreciate and cherish these institutions as they deserve."

After another musical number Rev. John C. Learned, President of the Board of Managers of the Public Schools, delivered the following address: —

ADDRESS BY PRESIDENT LEARNED.

The beginning of an enterprise of great importance to the welfare of St. Louis, has been successfully inaugurated. The corner-stone of a building for the better administration of our Public School system, has been laid with suitable ceremonies and by appropriate hands.

I consider it a favorable omen for the future of this undertaking, that Stephen D. Barlow, a citizen long known among us, and held in high favor for his services in the cause of education, has lent to this occasion his presence and the act of his approval.

This edifice is erected to serve not only the purposes of a bureau of public instruction, but the wants of a library.

The library is not a modern institution. Its beginning may be seen in the oldest civilizations. It dates back to Egypt and Asyria, when the walls of palaces and temples were covered with hieroglyphic or cuneiform inscriptions, when rolls of papyrus were laid away with mummies or stored up in tombs, when tablets and cones of terra cotta were written over with the transactions of remote centuries.

But our conception of the purposes of a Library is essentially new. The ancients thought chiefly of the accumulation and protection of books and records. And for these

ends they were wise. They chose means far surpassing any employed by us.

To be sure, we guard our treasures of manuscripts, of rare and fine books as well as we can. We put over them a solid fireproof building, as secure as modern art knows how to contrive. Yet we have nothing to resist the tooth of time like the rock chambers and pyramids of the Nile.

Attention is called to the fact that in our age of cheap book making, the material of books grows more and more perishable; our climate is damp and destructive; while the stone cylinders and clay tablets taken from the buried cities of the Euphrates, though written upon 4,000 and even 5,000 years ago, still tell their living story, and are perfectly legible.

If this city of St. Louis were overthrown or left to moulder, nothing of this building when perfected, still less anything of its contents, could be identified in a thousand years.

As I said, however, our object in creating a library is different from that of the ancients. They collected books for the few, for the privileged classes; we buy and distribute them for the many. They hoarded books for future ages; we spend them for our own. They sought to preserve literature from decay; we expose it, wear it out, by putting it to constant and widest uses. Instead of locking up this knowledge in great royal depositories, we would disseminate it among the people. We would preserve it in the circulating life and thought of the times, in the successive generations of men. In short, we would incarnate it, so to speak, in the body of our civilization; and thus by vitalizing society we would save it from that decline and overthrow which befell the empires of the past.

We have placed this Library in our plan above the administrative bureau of our Public Schools. Thus it would

seem to be the capital and crown of our system of public education. Not less when the doors of the school shut behind the youth, will the doors of the Library stand open to him; inviting him to enter in, to converse with the world's wisest and worthiest, to walk in the highest companionship of the moral and intellectual life.

John Locke said: "Education begins the gentleman, but reading, good company, and reflection, must finish him." We would offer this institution to the public as our aid to mental culture, and as a stimulus to noble aims. "The newspaper," said a recent speaker, "is the library of the moment, the library is the newspaper of all time." Here all may come to read the record of man's experience, of his success or failure, where the story of a thousand years may be scanned as one day.

What solemn and needed lessons may we not learn within these walls when they are made rich by the presence of great authors, with the learning of our own day and with the history and poetry of the past!

Only one thing is lacking. It is that the resources and advantages of this Library be made as free as our schools. To this building every man, woman and child should come for a book, for that life and help and education which a book can give, without money and without price, just as freely as to the courses of instruction provided by the State.

That is the next step to be gained. When that is accomplished the career of the Public Library will be fully assured. It will then be a Public Library not in name only, but in fact. And this is our last word on this occasion. We make our appeal to the public-spirited citizens of this city, to aid the officers of this library in bringing about this, this consummation of their hope—to give free reading to all the people, in all the homes of St. Louis.

The benediction was then pronounced by Rev. Montgomery Schuyler, D. D., Dean of Christ Church Cathedral. The national anthem, "America," was sung, and the crowd slowly dispersed.

APPENDIX.

JOINT ANNUAL REPORT
OF
SECRETARY AND AUDITOR
FOR 1890-91.

OFFICE OF THE BOARD OF PRESIDENT AND DIRECTORS }
OF THE ST. LOUIS PUBLIC SCHOOLS,
ST. LOUIS, JULY 1, 1891. }

To the Honorable the Board of President and Directors of the St. Louis Public Schools:

GENTLEMEN — The joint annual reports of the Secretary and Auditor for the fiscal year ending June 30, 1891, are herewith submitted:

1. **BILLS RECEIVABLE**, on hand June 30, 1891.
2. **BALANCE SHEET**, for the year ending June 30, 1891.
3. **REAL ESTATE AND IMPROVEMENTS** for School purposes, belonging to the Board June 30, 1891.
4. **RECEIPTS AND EXPENDITURES** during the year, from July 1, 1890, to June 30, 1891, both days inclusive.
5. **LIST OF UNLEASED LANDS** belonging to the Board June 30, 1891, for revenue purposes.
6. **LIST OF LEASED LANDS** belonging to the Board June 30, 1891, for revenue purposes.
7. **SCHOOL EXPENSES PROPER**, for the year ending June 30, 1891.

C. L. HAMMERSTEIN,
Auditor.

ATTEST:

JAMES Y. PLAYER,
Secretary.

BILLS RECEIVABLE ON HAND JUNE 30, 1891.

ALPHABETICAL LIST OF TEACHERS.

MAY 1st, 1892.

A.

NAME.	SCHOOL.	RESIDENCE.
Abbott, Mrs. Emma A.	Stoddard	2630 Chestnut St.
Ackerman, Alice	Substitute	3917 N. Twenty-fifth St.
Adams, Laura M.	Bell Avenue	3134 Brantner place.
Ahrens, Bertha	Ames	2921 Bacon St.
Alexander, Anne	Madison	1122 St. Ange Av.
Alexander, Kate	Madison	1122 St. Ange Av.
Allan, Anna	Ames	3113 Sheridan Av.
Althen, Anna	Garfield	2016 Sidney St.
Althen, Leonora	Lafayette	2016 Sidney St.
Alvord, Mrs. Laura C.	Lincoln	2933 Lucas Av.
Ambruster, Josie M.	Stoddard	109 S. Channing Av.
Andersen, Irene V.	Substitute	5305 Virginia Av.
Anderson, A. Lollie	Jefferson	1129 Washington Av.
Anderson, Ione Mrs.	Arlington	1908 Burd Av.
Anderson, Lizzie V.	Lowell	1521 College Av.
Anderson, Mattie	Lowell	1521 College Av.
Andrews, Isabella M.	Branch High	2734 Olive St.
Annis, Laura M.	Lyon	3016 S. Sixteenth St.
Archer, Fannie L.	Ames	Twentieth and Palm Sts.
Archer, Minnie	Ames	Twentieth and Palm Sts.
Archshoefer, Sarah	Jefferson	1014 N. Sixteenth St.
Armstrong, Belle J.	Simmons	2627 Mills St.
Armstrong, Mrs. Eliza M.	Sumner	2703 Russell Av.
Armstrong, Emma M.	Sumner High	2627 Mills St.
Armstrong, Louise H.	Sumner	2627 Mills St.
Arndt, Maude C.	Stoddard	7120 Lanham Av.
Ashbrook, Eugenia	Douglas	2429 Fall Av.
Ashcroft, Caroline	Stoddard	214 S. Garrison Av.
Ashe, George M.	L'Ouverture	209 S. Sixteenth St.
Atkinson, Mary I.	Pestalozzi	7124 Lanham Av.
Avery, Augusta S.	Substitute	2115 N. Twelfth St.

NAME.	SCHOOL.	RESIDENCE.
Avery, Edward M	Carroll	Webster Groves, Mo.
Avery, Kate.....	Webster	2115 N. Twelfth St.
Avery, Sarah T.....	Pestalozzi	Webster Groves, Mo.

B.

Bacon, Fanny M.....	Franklin.....	2720 Morgan St.
Bacon, Sarah J.....	Penrose.....	2613 Madison St.
Badgley, Jennie M.....	Jefferson	2922 Thomas St.
Baker, Anna.....	Irving	1100 N. Compton Av.
Baker, Mrs. Ella V.....	Laclede.....	2113 Lucas place.
Baker, Margaret F.....	Normal.....	1100 N. Compton Av.
Baker, Olive.....	Spring Avenue....	1100 N. Compton Av.
Baldwin, Katie E.....	Substitute	1433 N. Twenty-fourth St.
Barbee, Louise S.....	Roe.....	1404 Old Manchester road.
Barclay, Mrs. Annie J.....	Irving.....	4414 N. Twenty-first St.
Barclay, Julia M.....	Ames.....	1408 N. Ninth St.
Barnes, Jessie R.....	Clinton.....	1222 Second Carondelet Av.
Baron, Sophie.....	Carroll.....	1220 Dolman St.
Barr, Elizabeth.....	Adams	Kirkwood, Mo.
Barrett, Mary	Hamilton	1807 Carr St.
Barron, Belle	Divoll	3016 Olive St.
Barron, May F	Divoll	3016 Olive St.
Barton, Clara B.....	Bryan Hill.....	4310 Blair Av.
Batchelor, Sarah V.....	Normal (L. A.) ...	River Side, California.

REPORT OF THE EXAMINING COMMITTEE.

The report, which is as follows, was received and referred by the Board to the Ways and Means Committee and, also, to the Building Committee: —

ST. LOUIS, October 31, 1891.

To the Board of President and Directors of the St. Louis Public Schools:

MR. PRESIDENT AND GENTLEMEN:

The undersigned Committee appointed September 8th, 1891, "to examine the receipts and expenditures, vouchers, books and accounts of the Secretary and Treasurer and other officers of the Board, and to report the condition of the same to the Board, and also the cash received and paid into the treasury by each officer," during the fiscal year, commencing July 1, 1890, and ending June 30, 1891, herewith report:

The Committee commenced its work October 15, 1891, with Mr. Geo. Brown as its Secretary, and were, substantially, in continuous session daily to October 31, 1891.

TOTAL RECEIPTS AND EXPENDITURES.

We found that the total cash on hand, in bank July 1, 1890, was \$262,925.43. That since then there was received \$1,321,645.53; that the total expenditures of the Board amounted to \$1,272,667.22, leaving a total of cash on hand, in bank July 1, 1891, of \$311,903.74, and which we found was on hand.

We also found that for the expenditures there were duly audited and receipted vouchers representing the same and which were correctly entered on the books of the Board.

Concerning these matters we give further details below.

FINANCIAL SYSTEM OF THE BOARD.

In order that the statements of our report may be understood by all who read them, we will premise by saying that the financial system of the Board is made up of four divisions or funds, called respectively:

I. *General Fund.* Into this go the moneys received from taxes and from the State school fund apportionment, and the general income of the Board, and from it are paid out teachers' salaries, expenses of repairs, and other general expenses.

II. *Building Fund.* Into this go amounts transferred from the General Fund for the purpose of defraying expenses of building, and from it are paid out expenditures for building purposes.

III. *Permanent Fund.* In this are found bills receivable on hand at the commencement of the fiscal year, and into it go bills receivable and moneys received from the sale of certain real estate of the Board, which moneys, if expended, must be re-invested in like permanent form. The income from it may be used for ordinary school purposes, but the principal of it cannot, that having to be preserved intact.

IV. *New High School Fund.* Into this goes money appropriated for the building of the New High School on Grand avenue, and from it are paid out the expenditures on account of that building.

These designations run through the entire financial system of the Board.

SYSTEM OF BOOK-KEEPING.

The system of book-keeping in use by the Auditor is a system of double entry, simple and practical, devised by Mr. C. L. Hammerstein, Auditor, and adopted with the approval of the last previous annual examining committee,—Messrs. Fielding Mansfield, Morris J. Lippman, and Richard Bartholdt.

In the office of the Secretary and Treasurer there are a day book and cash book combined, a receipt book containing forms of receipts and duplicate stubs. When a payment to the Board is made the payor receives the receipt, and the Auditor receives one of the stubs which serves as a memorandum to make the proper entries in his book, and the other stub is kept in the receipt book, and proper entries made in the Secretary's day and cash book. The Secretary and Treasurer also has charge of the bank pass book of deposits with the German Savings Institution and of the record books of the Board.

In the office of the Auditor there are a day book and cash book combined, a journal, a ledger, a trial balance book, and rent roll account, and minute book of the Building Committee.

The bailiff has a cash book of rents, and a ledger, in which he keeps a list of rent bills unpaid and on hand.

In the office of the supply agent there are a text book stock account, containing a complete record of the receipt and disposition of stock and inventories of stock on hand, a book of issue of supplies general, free and indigent, a ledger containing accounts with principals, a book of approved bills, a receipt book, and a record book of meetings of the Supply Committee.

In the office of the Superintendent of Construction and Repairs is one book entitled "List of Repairs," more fully described hereafter.

The entries of accounts of the various officers all pass into the general books of account in charge of the Auditor.

FINANCIAL STATEMENT.

The following is a statement of the receipts and expenditures of the St. Louis Public Schools for the fiscal year ending June 30th, 1891 : —

The amounts set opposite the names of different schools and buildings are the amounts paid on account of the erection or purchase of said buildings from the time they were erected or purchased.

The Committee verified these balances and found them correct.

VOUCHERS.

The Committee examined the vouchers paid during the year, numbering in all 1,972, commencing with number 15,662 and ending with number 17,634. The examination of these vouchers consumed several days, and was conducted with care. The Committee found that the bills attached to the vouchers had all been approved by the committees or officers whose duty it was to approve the same when correct, and each voucher had been audited by the Auditor and audited by the Auditing Committee, and approved by the Board before payment. They were all paid before July 1, 1891, except one, No. 17,514, in favor of Henry Kranz, for rent, amounting to \$45.00. The holding over of the check by Henry Kranz caused a difference of like amount between the cash in hand in bank, belonging to the General Fund on July 1, 1891, as represented by the Auditor's books, and the amount represented by the bank's books, the latter amount being \$14,328.25 and the former \$14,283.25, a difference of \$45.00. The Committee checked off the payment of eleven vouchers outstanding on the first of July, 1890. These were mentioned in the report of the previous Examining Committee as being outstanding July 1, 1890, and were of the numbers 15,269, 15,497, 15,558, 15,579, 15,580, 15,582, 15,608, 15,628, 15,632 and 15,637.

The Committee found that each voucher was correctly entered in the Auditor's cash and day book.

Most of the bills attached to vouchers concerning repairs bore the impression of a rubber stamp. (In Chief Engineer Lee's time, "I have examined above bill and found same correct, Lee," and since Lee's time, "Correct, B. R. Singleton, Supt. C. & R.")

The Committee inquired into the manner of keeping and using the stamp of Mr. Singleton, and came to the conclusion that the use of the same was not advisable, that the

facility of its use was likely to lead to error by approval of bills which ought not to be approved, and that the Board had not sufficient protection from the danger of duplication of the stamp, and its use by unauthorized persons. Two cases of error in the approval of bills, then no longer a charge against the Board, came before us and were explained by Mr. Singleton.

Payment in one of the cases was stopped by the officers of the Board and in the other the proposed recipient of the money declined to take it.

The average number of times the approval of bills would have had to be written by the Superintendent of Repairs per month was in the neighborhood of 200.

The bills inspected bore evidence of careful scrutiny on the part of the accounting officers of the Board, showing that they were alert in the performance of their duty.

SECRETARY AND TREASURER'S OFFICE.

The charge of the office of Secretary and Treasurer was, shortly after the death of the late Milton H. Wash, turned over by Mr. Hammerstein, then acting secretary, to Mr. James Y. Player, who had been elected Secretary and Treasurer, and who commenced his duties as such on the 23d of July, 1890.

When the office was turned over to Mr. Player, he as Treasurer was charged with the balances in bank, and which were as follows:

General Fund.....	\$125,223 99
Permanent Fund.....	164,802 28
Building Fund	6,699 63
Total.....	<u>\$296,725 20</u>

Mr. Player then started with fresh balances.

We examined the books, papers and accounts in the office of the Secretary and Treasurer, and found the same in excellent condition, the entries correctly made and the

balances perfect, and the management of the office honest, business-like and worthy of the high degree of confidence reposed in it.

The bills receivable face value \$201,725.14 (July 1, 1891) in possession of the Secretary and Treasurer were among the papers examined; they were compared with the ledger entries, and found correct.

These bills receivable belong to funds as follows:—

General Fund.....	\$387 86
Building Fund.....	144,800 00
Permanent Fund.....	56,537 28
Total.....	\$201,725 14

The leases also in possession of the same officer, were compared with the rent rolls, which were found to be correct.

AUDITOR'S OFFICE.

We also examined the books, vouchers and accounts in the office of Mr. C. L. Hammerstein, Auditor, and the method of book-keeping there employed, as to all of which we have nothing but words of commendation. The entries of vouchers and accounts, singly and collectively, were correct to a cent, and the extensions, additions and footings were strictly accurate. The bills presented for auditing had unquestionably been examined with great care, and numerous corrections made in bills in the interest of the Board, as the bills examined by the Committee show. The Auditor is entitled to cordial support, and should have it.

SUPPLY DEPARTMENT.

Your Committee also examined the books and accounts in the supply department, which is under the charge of Mr. William Bryan, Supply Agent, and also examined the method of distribution of books, the method of accounting on the part of principals, and stock taking. We found the

office and store-room in perfect order, models of neatness, nothing to criticise and everything to commend. Stock is taken every week and a general inventory at the close of each scholastic year. Payments of cash received for books are made by Mr. Bryan to the Treasurer several times each month.

The following is the inventory of text-books, etc., June 30th, 1891.

Your Committee has reason to believe that the rules prescribed by the Board for the management of this office and the carrying out of the free book system, as far as this office is called upon to carry it out are rigidly adhered to.

The following is a statement of text-books received, sold, and on hand in the Supply department, and the cash payments into the Treasury from July 1st, 1890, to June 30th, 1891:

Books on hand July 1st, 1890.....		\$7,522 84
Purchased since.....		43,760 67
		<hr/>
Total.....		\$51,283 51
Cash received from Principals for books sold during year ending June 30th, 1891.....		\$28,517 42
Free Books for the first 4 grades delivered to the schools during year ending June 30th, 1891.....		10,064 89
Books for indigent pupils above the 4th grade delivered to the schools during year ending June 30th, 1891.....		3,520 83
Books on hand at the department for sale.....		9,180 37
		<hr/>
Deposited in the Treasury as shown by the books of the department.....		\$28,517 42

FREE TEXT-BOOK SYSTEM.

As attention has been called in the Board recently to the free book system your Committee deemed it within its province to inquire into the workings of the system. As is known to the members of the Board, better than by the public, the giving of free books as free books is confined to the pupils in the first, second, third and fourth grades. Pupils in the sixth, seventh and eighth grades are required

to pay for their books unless they produce an application signed by the parent of the pupil, in the following form :

No.

APPLICATION FOR BOOKS.

Mr. 189
 Principal..... School.
 I hereby certify that I am not able to get books for my child
;
 I would ask the School Board to furnish them; will preserve and return
 them in good condition.
 Signed:

 Parent or Guardian.
 My occupation is.....
 Residence..... street.

The money value of books given as free books in the last fiscal year was \$10,064.89, and the value of books furnished pupils upon the above form of application, was \$3,520.83, a total of books which may be properly termed "Free Books," of \$13,585.72, and which may be said to have been the cost of the free book system during that year.

Books are sold only upon application of principals, and all applications from persons not authorized to purchase them are refused. Many such instances occur. The price at which books are sold is a slight excess above the whole-sale or less than wholesale price at which the Board purchases, this excess being such as will barely cover the cost of freight.

The amount of Text-Books bought during the year was \$43,760.67, and the freight bills paid thereon amounted to \$643.43. This would leave about 1 47-100 per cent. to be added to the books. The amount is equalized on the different books as equitably as can be.

Inquiries at Superintendent Long's office as to the degree of faithfulness with which the wishes of the Board in the

matter of Free Books have been carried out by Principals and Teachers show that only one complaint was made to the office of refusal to give books in the year; that refusal arose from a misunderstanding on the part of a teacher and that misunderstanding was straightened out and the books furnished to the pupil.

BAILIFF'S OFFICE.

Your Committee examined the rent roll in the office of Mr. H. Clay Sexton and found the same correctly kept, and payments properly made to the Treasurer. The following is a statement of matters in the Bailiff's office during the year as to which we are reporting:

To uncollected rent bills in hands of former Bailiff, Mr. G. M. Baare, July 1, 1891.....	\$6,135 01
To rent bills delivered to him.....	5,690 07
Total.....	\$11,825 08
By cash collected and paid into treasury.....	7,898 08
Balance uncollected bills in hands of former Bailiff, July 23d, 1891, and delivered to his successor, H. Clay Sexton... ..	\$3,927 00
To rent bills delivered to present Bailiff since July 23, 1891.....	48,193 22
	\$52,120 22
By cash collected and paid into treasury.....	\$48,550 25
By uncollectible bills authorized to be credited...	665 28 49,215 53
Balance uncollected rent bills in hands of present Bailiff, Mr. H. Clay Sexton, July 1, 1891.....	\$2,904 69

CORROBORATIVE STATEMENTS.

The Committee received from the German Savings Institution (the depository of funds of the Board) the following statements:—

APPENDIX.

cix

German Savings Institution, }
St. Louis, Mo., Oct. 31, 1891. }

M. J. Lippman, Esq., Chairman Examining Committee.

Dear Sir: This is to certify that the credit balances of the following accounts was at the close of business of July 1st, 1891, as it appears upon the books of this institution:—

General Fund.....	\$14,328 25
Permanent Fund.....	236,120 75
Building Fund.....	11,499 74
New High School Fund.....	50,000 00
Total	\$311,948 74

Yours respectfully,

H. HUNICKE, Ass't Cashier.

German Savings Institution, }
ST. LOUIS, MO., Oct. 13, 1891. }

M. J. Lippman, Esq., City.

Dear Sir: This is to certify that on the first day of July, 1891, the German Savings Institution had on deposit with the Chemical National Bank of New York, five hundred and twenty-five thousand dollars (\$525,000.00) in St. Louis City Bonds, as security for the balances of the Board of President and Directors of the St. Louis Public Schools.

Respectfully,

R. HOSPES, Cashier.

DEPOSITORY OF BONDS AND POLICIES OF INSURANCE.

Your Committee on the 24th of October, 1891, in company with President Charles F. Miller and Secretary James Y. Player, visited the vaults of the Safe Deposit Company on Locust street between Fifth and Sixth streets, St. Louis, and examined the contents of the box rented by the Board. Access to the box is had only by the use of two keys, each being necessary to be used; one of these is held

by the President of the Board and the other by the Secretary and Treasurer. We found the following bonds and papers on deposit :

Commercial Bonds:

Twenty-one 6 per cent. Missouri State Bonds — face value..\$21,000 00
Four U. S. 4 per cent. bonds — face value..... 400 00

\$21,400 00-

Official Bonds:

Milton H. Wash — Late Sec'y and Treas.....	\$50,000 00
Leo Rassieur, former Attorney.....	10,000 00
G. M. Baare, former Balliff.....	10,000 00
Wm. Bryan, Supply Agent (two bonds).....	5,000 00
B. R. Singleton, Supt. Construction and Repairs	5,000 00
John Kelly, Assistant Superintendent of Construction and Repairs.....	5,000 00
Wm. Lee, formerly Chief Engineer.....	5,000 00
James Y. Player, Sec'y and Treas. (two bonds).....	50,000 00
C. L. Hammerstein, Auditor.....	10,000 00
C. B. Stark, Attorney.....	10,000 00
H. Clay Sexton, Balliff.....	10,000 00
Henry Zeigenhein, City Collector.....	200,000 00
Insurance Policies on Polytechnic Building (carried by Robt. S. Brookings).....	50,000 00
Insurance policies on furniture and fixtures in Polytechnic Bldg. (carried by the Board).....	10,500 00

BUILDING.

An unusually large amount of building has been in progress during the year. The Board has, in actual operation, eighty-five schools, having 106 buildings. New school buildings started since June 30, 1890, were the following :

	No. of rooms.	Date of contract.	Amount of contract.
Pope.....	6	August 12th, 1890	\$21,800 00
Spring Av.....	4	"	13,082 00
Hamilton.....	4	"	15,359 00
Garfield.....	4	"	15,300 00
Rock Spring Kindergarten.....	1	"	5,182 00
Simmons.....	2	"	5,184 00
Aldridge.....	2	"	7,315 00

APPENDIX.

cxi

Arlington.....	4	January 13, 1891	\$18,157 00
Elleardville.....	6	"	19,250 00
Blair Kindergarten..	2	"	6,860 00
Banneker.....	3	"	14,740 00
Ames.....	4	June 23, 1891	8,925 00
Bryan Hill.....	6	"	13,934 00
Longfellow.....	6	"	20,100 00
Irving.....	3	"	7,653 00
Jefferson Kindergarten Extension...			2,276 00
Oak Hill.....	2	June 23, 1891	5,483 00
Adams	8	"	21,848 00
Marquette.....	12	"	41,000 00
Remodeling, in part, Shields school (formerly St. Patrick's).....	16	"	6,950 00
			<hr/>
			\$270,398 00

These schools and additions will give an additional seating capacity for five thousand pupils.

In addition to these some new school buildings commenced previous to July 1st, 1890, were in process of construction during this year.

We also find that the contract for the new Board Building at Ninth and Locust streets was let April 14th, 1891, and the contract price is \$344,900.00.

The contract for the New High School Building (\$297,000) was not let until after June 30th, 1891.

Contracts for heating the above named schools were made as follows: —

Pope (heating and boilers).....	\$2,538 00
Spring Avenue (heating).....	1,725 00
Hamilton.....	1,800 00
Shields (formerly St. Patrick's).....	4,142 00
Garfield	975 00
Elleardville.....	6,400 00
Blair kindergarten.....	1,145 00
Banneker.....	1,473 00
Irving.....	1,085 00
Boilers, Garfield, Hodgen and Blair.....	3,369 00
<hr/>	
Total.....	\$24,652 00

Seven firms of architects were employed to prepare plans for and superintend the erection of new buildings, and these gentlemen were paid, during the year, \$15,599.47, for their services in that regard; \$8,622.50 of that amount was paid to Mr. Isaac S. Taylor as Architect and Superintendent of the new Board Building, that being the first half of the total amount of fees he is to receive in connection with that building. The Board pays these architects on the basis of three per cent. for plans and specifications and two per cent. for superintendence, together five per cent. on the total amount expended in the erection of the buildings. These charges are the rates fixed by the schedule of the St. Louis Institute of Architects.

Mr. B. R. Singleton, Superintendent of Construction and Repairs, prepared plans and specifications for three of the schools: Oak Hill, Jefferson Kindergarten and Irving Addition.

RULES 70 AND 71.

The following are among the provisions of the Rules of the Board.

Rule 70. * * * "All work on new buildings, and "all repairs and additions costing more than \$100, shall be "let by contract to the lowest and best bidder."

Rule 71. * * * "Any repairs, the cost of which "exceeds one hundred dollars, shall not be ordered with- "out the sanction of the Board, but said committees shall "be empowered to order repairs whenever the same are "necessary for the protection of the property of the "Board."

Reference is made to this because in examining the vouchers the Committee found that a considerable number of bills were for work which was given out in violation of the above rules, and as it involved expenditures by the Board

the matter came properly within the purview of the Committee. Twenty-seven of these bills were reported by the Auditor to the Board at the meetings of August, September, October, November and December, 1890, and January, 1891, as having been made without the taking of competitive bids, and as being in excess of the limit prescribed by the rule above which bids must be taken. But the Board, when its attention was called to the fact, promptly ordered them paid. Seventeen other bills, each exceeding \$100 in amount, taken without competitive bids, were subsequently reported in the report of the Building Committee, as emergency work, but without mention that bids were not taken, and they were also, by the Board, ordered to be paid. These were in February, March, April, May and June, of 1891.

The bills reported by the Auditor were the following:—

T. F. McDermott — brickwork Clinton School.....	\$151 30
James Ruane — painting Madison School.....	161 20
Edw. F. Byrne — painting O'Fallon School.....	190 80
Jas. S. Dowling — painting High School.....	212 95
Patrick J. Mahon — Penrose School.....	207 45
Patrick Kirby — painting Divoll School.....	320 60
Ratchford & Tighe — painting Shepard School.....	154 80
Ratchford & Tighe — painting New Shepard School.....	169 20
Ratchford & Tighe — painting Madison School.....	178 05
Ratchford & Tighe — painting Sumner High School.....	145 80
Baker & Keane — brickwork Penrose School.....	121 00
F. A. Drew Glass Co. — glass.....	220 30
Ripley & Bronson — steam-fitting Pope School.....	346 07
J. O'Brien Boiler Wks. — brick chimney Pope School.....	143 00
Patrick Madden — plumbing Pope School.....	110 60
John McMahon — water attachment.....	126 95
Ripley & Bronson — steam-fitting Penrose School.....	163 39
John Cudmore — carpenter work Carr Lane School.....	222 15
John Cudmore — carpenter work No. 1 School.....	266 05
Christopher & Simpson — iron work Clinton School.....	104 50

“ “ “ “ “ “	180 95
“ “ “ “ Clay “	120 20
<hr/>	
Total.....	\$3,712 58

Your Committee is of the opinion that much of the work included in these bills was such that competitive bids could have been taken therefor, and that the phrase “ emergency work ” has been given an elasticity not thought of when first used. The first use of the phrase was a legitimate use of it, and in such case Rule 70 was not violated. The subsequent and frequent use of it leads us to the conclusion that it was a misnomer and that the rule was regarded only to be evaded. Some of the bills we examined show on their face that the work was of such a character that bids could well have been taken therefor, and that they were not for emergency work. So being they came within the inhibiting clause of the rule. This inhibiting clause is the

vital feature of the rule, and is directed to the thing rather than to the person. The rule was no less disregarded because work was given out by the Building Committee rather than by the Superintendent of Repairs. The exception in Rule 71 is subsidiary. Your committee believe that the principle of the inhibiting clause should be adopted and guarded to a greater extent than the rule, as now worded, contemplates, as a salutary safeguard for the interests of the Board. Instead of being disregarded the rule ought to be made more stringent and efficacious. Your Committee has diligently sought for a satisfactory explanation of why this work was given out in this manner, but has failed to receive one.

Certain bills contracted without competitive bids were taken, each in excess of \$100, but being for fire damages, were not in violation of the rule, coming within the last clause of Rule 71. These bills were as follows: —

James Ruane and others (6 bills), Shaw School.....	\$1,673 36
Hellrung and Grimm, Jefferson Kindergarten.....	214 55
John Cudmore, Jefferson Kindergarten.....	649 50
John Cudmore, Lincoln School.....	1,740 55
J. S. Dowling, Lincoln School.....	389 47
	<hr/>
	\$4,766 83

CARPENTER WORK.

We have reason to believe that necessary repairs have been neglected and delayed on account of the imperfect distribution or non-distribution of certain work required to be done at certain schools, to the inconvenience and injury of the schools. By "imperfect distribution" we mean the giving of work to one firm when good business policy would have dicatated its being divided amongst several firms, especially if there were an emergency for its prompt execution.

The bills attached to thirty vouchers being vouchers between numbers 15,727 and 17,495, payable to J. Cudmore,

and including certain fire damages before mentioned, amounted to \$9,688.64. Much of the work given to Mr. Cudmore has, we are informed, been given him by or at the instance of directors of the districts in which it was done; these districts comprising five of the seven districts into which the city is divided by the Building Committee for the supervision of or attention to work by the members of the Committee.

We are informed that the work done by Mr. Cudmore was done at current market prices and that the fire damages at the Lincoln School, amounting to \$1,740.55, were repaired with exceeding promptness and with entire satisfaction, the school being got ready for use within four or five days after the fire, and the fire having taken place March 23d, 1891, in the midst of the scholastic season, it was desirable that as little delay as possible occur in the completion of the work.

"REPAIR GANG."

From the best information obtainable we learn that there are employed by the Superintendent of Construction and Repairs, throughout the year, an average of eleven or twelve men familiarly and officially called the "Carpenter's Gang," and sometimes the "Repair Gang." At the busiest times there have been employed by the day five carpenters, seven laborers, eleven furnace men and a driver, a total of twenty-four men, not including Mr. Kelly, Assistant Superintendent in this department, Mr. B. R. Singleton, Jr., Clerk, and sometimes a draftsman employed in the office. It is the duty of these workmen to make repairs not given out to builders and furnace dealers.

MANAGEMENT OF THE BUILDING DEPARTMENT.

In the course of our examination, being charged with the duty of examining the "Books and Accounts of the Sec-

retary and Treasurer, and other officers of the Board," we called for the books of the building department, under the immediate supervision of Mr. B. R. Singleton, Superintendent of Construction and Repairs, and there was produced before us but one book entitled "List of Repairs," and we were informed that no other books were kept by the Superintendent. This list is simply a memorandum book which is used by the Superintendent to enable him to make up his monthly report to the Board of the cost of repairs at various schools each month, and the entries therein are simply memorandum entries under the names of different schools, but to which no dates are attached, the only designation of time being one entry of the month and year at the head of each page. Each page contains numerous schools.

The only other book kept by the building department is a book of minutes of the proceedings of the building committee which is kept in the Auditor's office.

In view of the very large amount of expenditures being made by the Building Department, we cannot too strongly recommend that an entire set of books, independent of those of the financial officers of the Board, be kept in the office of the Superintendent of Construction and Repairs. That said set shall be sufficient in number and kind, to present at all times a complete and independent record of the transactions of the Building Department, and that they shall show, with reasonable plainness, and in tabular form, the various steps in jobs of repair and permanent construction or improvement, from the first reporting of the needed work to the completion and payment therefor, to wit:—

1. Date of first reporting.
2. Action thereon.
3. Date of ordering the work.
4. By whom ordered.
5. Estimated or agreed cost.

6. Whether given out on competitive bids on contract, or otherwise.
7. To whom let.
8. Inspection and approval or disapproval by the Superintendent of Repairs.
9. Date of completion.
10. Actual cost on completion.

And such other information, if any, as may be deemed necessary.

That a proper system of filing reports and other documents in the office of Superintendent of Construction and Repairs, for ready reference, be inaugurated.

The books of the financial officers ought not to be incumbered with details such as are here contemplated, and which we believe are necessary to be kept for the protection of the interests of the Board, and the proper carrying out of work in the building department. Such details properly belong to an independent set of books under the immediate charge of the executive officer having the supervision of the work — the Superintendent of Construction and Repairs — and it properly belongs to the building department.

An incidental result of the adoption of such a system would be the relieving of the Building Committee of the necessity of a fruitless inquiry as to how certain work came to be ordered, which questions we understand are of more or less frequency in the Committee.

Rule 45, Section 3, speaking of the Superintendent of Construction and Repairs and his duties, says: "He shall keep an accurate record of all accounts for the information of the Building Committee, and for the purpose of furnishing data for the guidance of the Board and its members and officers."

We find that this has not been done.

CHECKING OF TIME WORK.

A step in the right direction in the matter of checking time work has been taken by the Board (page 640, Vol. VII., Printed Proceedings), in the requiring of certificates signed by janitors to be attached to certain vouchers, such certificates having to show the actual number of hours that men were engaged upon work. These certificates, although in use only a short time, have been fruitful of much good and have nipped in the bud some attempted frauds and their use ought to be continued. A number of the janitors fill them out in pencil, which has been found open to objection, and they ought to be written in ink. When prepared they ought to be delivered to the proper officer of the Board and not to contractors.

PAYMENTS INTO THE TREASURY.

The amounts paid into the Treasury by officers of the Board, during the year, were : —

William E. Bryan, Supply Agent.....	\$28,517 32
H. Clay Sexton, Balliff.....	56,448 33
For scrap iron and fire brick sold.....	579 78

FINES.

The amount of fines coming to the School Fund, and paid in by constables and the clerk of the Court of Criminal Correction was \$364 00.

TUITION.

The total amount received from non-resident pupils, for tuition, was \$2,108.80.

PERMANENT FUND.

There is now very little cash in hand in the Permanent Fund, it having been placed in the cash account for the purpose of erecting the new Board Building on Ninth and Locust streets.

A SUGGESTION.

During our examination of the vouchers, it appeared to us fair to assume that the following provisions of Rule 86, had been violated in spirit, if not in the letter, in more than one instance: —

“No member of the Board of President and Directors of the St. Louis Public Schools, or any officer or employe of the Board shall be directly or indirectly interested in contracts for building or repairing school houses, or in furnishing supplies to the schools or to the Board.”

This Committee has not, of course, exceeded its authority by endeavoring to secure positive evidence that certain requirements of your rules were not carefully observed; but there is certainly sufficient grounds on which to base a suggestion as to the Board's duty in this matter.

ACKNOWLEDGMENTS.

Approaching the close of their report the Committee is not unmindful of the fact that a very large amount of work in building and repairs has been done during the past year, doubtless much of it of the best quality, at current market prices, and with intelligent and careful supervision on the part of those employed to supervise it; that school facilities imperatively demanded by the increasing population of the city, have been furnished, and buildings inaugurated which are to be a lasting monument of the St. Louis School System. The pressure of work at times in the building department and its office has been unusually great on account of the limited time given for some of the work.

We desire to express our cordial thanks to all the officers of the Board we have come in contact with: Messrs. James Y. Player, C. L. Hammerstein, B. R. Singleton, William Bryan and H. Clay Sexton, for the readiness manifested to

give all information asked and to assist the Committee in its work in every way. We would also include in this acknowledgment Miss Bertha Schaper, and Mr. Otto L. Zelle, efficient clerks in the Secretary's office.

RECOMMENDATIONS.

The Committee, after having given their best attention to the various subjects which have come before them in their examination, respectfully and earnestly make the following recommendations to the Board:—

I. That proper books of account and record be kept by the Building Department in the office of the Superintendent of Construction and Repairs.

II. That all work of whatever amount (whether less or more than one hundred dollars) given out without competitive bids be reported to the Board with reasonable fullness of detail as to the reason for not taking bids, by the Committee or officer reporting on the work.

III. That such work of repair and construction as cannot, in the judgment of the Building Committee, be advantageously estimated upon by reason of its character and uncertainty as to quantity, be done, as far as possible, by the men employed in the Building Department, and that if they are not sufficient, under proper supervision, to do the work, additional workmen be temporarily employed, according to the judgment of the Superintendent of Repairs and the Building Committee. And that such instances be reported to the Board.

IV. That in the event of work (of any amount) being given out to builders without competitive bids having been taken thereon, and the Board has not been distinctly informed of such fact, the bills for the same be not paid until after the Auditor has specially reported thereon, giving the Board information that competitive bids were not taken, nor until

after the Board has acted on such report submitted by the Auditor.

V. That the Superintendent of Construction and Repairs in his monthly report of repairs state the number of workmen employed during the month by the department.

VI. That the use of rubber stamps in the approval of bills by certain employes of the Board be discontinued.

VII. That the use of the Janitors' certificates, heretofore referred to, be adhered to.

VIII. That the Board determine early in February or March of each year what work is needed and has to be done at the various schools or in the erection of new schools, so that the Superintendent of Construction and Repairs may have ample time to prepare plans and specifications therefor and invite wide-spread competitive bidding.

Respectfully submitted,

MORRIS J. LIPPMAN,

Chairman.

MICHAEL LYNCH,

JOHN M. DUTRO.
